

What's new?

SIMARIS project

Totally Integrated Power

[siemens.com/simaris](https://www.siemens.com/simaris)

Version 6.3 (update) 04/2021

- System-compatibility
 - SIMARIS project 6.3 allows to load projects of version 5.x and 6.x
- Newly integrated products and systems
 - 3WA circuit-breaker
 - 3NJ63 switch-disconnector with fuses
- Data adaptations of products and systems

Product portfolio update, mounting options for new devices as well as adaptation of editing functions for:

- NXAIR C medium-voltage switchgear (up to 2000A)
 - SIVACON S8 low-voltage switchboard
 - BD2, LD and LI busbar trunking systems
 - 3VA molded case circuit-breaker
- Interfaces
 - Interface to SIMARIS design (transfer file from SIMARIS design) expanded by new devices incl. automatic assignment to matching systems and automatic configuration
 - Project data transfer from SIMARIS design 10.1 to SIMARIS project 6.3 is possible by way of the transfer file, project data transfer from previous versions (SIMARIS design 10.0 and earlier) is not possible with SIMARIS project 6.3
 - New interface to SIMARIS busbarplan
 - Documentation updates
 - Export of 3D-data for BIM (Building Information Modeling) in IFC 4.0-format for further systems
→ Download plug-in for import into Autodesk Revit at www.siemens.com/simarisproject/bim
 - Tender specification text updates about products and systems (GAEB xml, rtf) as well as additional output of international format (rtf)
