Siemens offers turnkey installation, commissioning and start-up services for our spectrum of medium-voltage gas-insulated switchgear (8DA10/8DB10) and load interrupter switchgear (SIMOSEC). Turnkey solutions from Siemens increase equipment reliability and performance, reduce life-cycle costs, and increase equipment and employee safety.

**Customer benefits:**
- Single source supplier with no third parties to coordinate
- Augment your in-house service capabilities
- Factory trained field engineers who specialize in medium-voltage gas-insulated switchgear installations
- Comprehensive project management with access to OEM engineering departments who understand your equipment design and technology
- Turnkey installations can also include extended warranty

Service solutions for your T&D infrastructure

**Turnkey installation services**
Siemens will provide a project manager, lead field service engineer(s), work crew, tools and test equipment to install the new equipment. Typical services include:

- Pre-outage planning and logistics
- Uncrate equipment, set in final position and level
- Assemble switch panel
- Make high-voltage busbar connection
- Install control cabinet wiring
- Install bus and line voltage transformers
- Complete gas works
- Routine commissioning tests
- Perform mechanical functional checks
- Perform electrical functional checks
- Terminate cables and install cable plugs
- Submit installation & commissioning report
