

## SHORT DESCRIPTION

PowTechnology have been intelligent automation specialists for over 30 years and a Siemens Measurement Intelligence Solution Partner. We have helped customers harness data from sensors and machines to the cloud to improve reliability, performance and sustainability. The Siemens Measurement Intelligence portfolio of sensors and instrumentation integrates seamlessly with PowTechnology 'ready-to-go' gateways, enabling users to gather data quickly, easily & cost effectively and facilitating holistic customer-specific solutions. PowTechnology brings together OT and IT.

## JOINT VALUE PROPOSITION

+

### Proven & Easy

A range of sensor gateways that suit many different applications in numerous sectors with easy onboarding and no code setup means you can get data flowing in an instant. Viewing graphs on your computer, tablet or smartphone, receiving alarms when thresholds are breached and lots more.

+

### No power. No problem

Battery and Solar powered to suit a range of circumstances which maximise performance and minimise maintenance. This means you can get data from locations where there is no power or running the cable isn't ideal. Getting data from stranded assets has never been easier.

+

### Data Integration

Sensor agnostic interfaces in the field and easy integration to 3rd party apps and software systems through a straightforward API means you can get further benefit from the data being collected. Seamless integration that enables Xceleration.

”

**Our decades of experience in remote data acquisition from sensors & machines has led to a wealth of testimonials and case studies demonstrating our versatile capabilities.**
