

VAR PARTNER DAY 2022 | SEPTEMBER 12-14 | ZAGREB

FINAL COVID-19 SAFETY & PREVENTION CONCEPT

Premise:

Siemens AG Österreich will gather over 100 Partner Company representatives and Siemens employees from CEE and Asian country organizations to participate in our annual Value Added Reseller (VAR) Partner Day from September 12 – 14, 2022. This early date was selected to avoid expected increases in COVID-19 infection rates later in the year.

To ensure that our event can take place with maximum comfort and safety, we planned the 2022 event with a COVID-19 concept that meets or exceeds all current regulatory requirements.

However, since Croatian health authorities have not imposed any regulations for the period of our event, our COVID-19 concept is hereby reduced, as follows:

“3G” Recommendation:

Ideally, every participant of our VAR Partner event will be immunized with an approved vaccine OR can present a certificate proving negative COVID-19 test OR recovery from a COVID-19 infection. We recommend that all participants should have a negative COVID-19 test result (at least an antigen quick test) before travelling – to rule out an existing infection, especially for those without a third (3rd) EU-approved vaccination.

Preventive Measures:

- The event locations have been selected to allow greater distances between persons.
- All rooms will be aired as far as practicable with fresh air during the breaks.
- Disinfectant dispensers will be available in all rooms that are part of the VAR 2022 event.
- Participants are advised to wear masks in situations where the minimum distance cannot be maintained (e. g. in elevators). FFP2 masks will be available on site and issued upon request.
- Any special mask requirements announced during the event shall be obligatory for all.
