|    | Transmission person to person (Offices) | Contraction of Covid-19 through droplets via coughing, sneezing and exhaling | Employees, Public, Contractors | 4 3 12 Medium | The approach for Siemens within offices remains working from home during the pandemic, as the first and most desirable option. Any visit MUST be authorised first by your Line Manager. For activities that need to be completed, and cannot be done from home, site specific risk assessment must be completed to determine the most appropriate control measures to prevent exposure, considering the following (non-exhaustive):
- Social Distancing (>2m) must be maintained at all times this will be supported by floor and wall signs in the office to aid with distancing
- Good personal hygiene to be maintained
- Very low office occupancy, due to only essential work requiring office attendance
- Avoiding face-to-face seating/use of shielding between opposing desks and communal areas, such as reception
- Occupation allowing for 2m or more, in terms of rows and seats apart
- Only one person in an lift at one time
- Maximum occupancy is based on the available desk space - however the people coming into the office must meet the requirements of an assessment by their Line Manager
- One-way flow of pedestrians at the front-end of floors 3 and 4, by the large kitchens
- Kitchens on floor 3 are one occupant at a time (being mindful of 2m distance of people entering/leaving the kitchens
- Kitchen on floor 4 is two occupants maximum at a time (being mindful of 2m distance of people entering/leaving and moving around the kitchen)
- Marking/barriers of public areas/lobbies/reception etc to maintain social distancing
- Toilets ideally should be single occupancy at point of entry (i.e. from corridor) to maintain social distancing
- Communication via Teams/Circuit meetings, email and printed media around site. |

What is the Effect (Risk) from the hazard? Contraction of Covid-19 through droplets via coughing, sneezing and exhaling

Who/what would be at risk Employees, Public, Contractors

Likelihood x Severity - Uncontrolled Risk Factor / Rating 4 3 12 Medium

Control Measures

The approach for Siemens within offices remains working from home during the pandemic, as the first and most desirable option. Any visit MUST be authorised first by your Line Manager.

For activities that need to be completed, and cannot be done from home, site specific risk assessment must be completed to determine the most appropriate control measures to prevent exposure, considering the following (non-exhaustive):

- Social Distancing (>2m) must be maintained at all times this will be supported by floor and wall signs in the office to aid with distancing
- Good personal hygiene to be maintained
- Very low office occupancy, due to only essential work requiring office attendance
- Avoiding face-to-face seating/use of shielding between opposing desks and communal areas, such as reception
- Occupation allowing for 2m or more, in terms of rows and seats apart
- Only one person in an lift at one time
- Maximum occupancy is based on the available desk space - however the people coming into the office must meet the requirements of an assessment by their Line Manager
- One-way flow of pedestrians at the front-end of floors 3 and 4, by the large kitchens
- Kitchens on floor 3 are one occupant at a time (being mindful of 2m distance of people entering/leaving the kitchens
- Kitchen on floor 4 is two occupants maximum at a time (being mindful of 2m distance of people entering/leaving and moving around the kitchen)
- Marking/barriers of public areas/lobbies/reception etc to maintain social distancing
- Toilets ideally should be single occupancy at point of entry (i.e. from corridor) to maintain social distancing
- Communication via Teams/Circuit meetings, email and printed media around site.

<td></td>
<td>Transmission from surfaces (Offices)</td>
<td>Contraction of Covid-19 through droplets on surfaces &gt; touched by employee &gt; touches face/mouth/nose.</td>
<td>Employees, Public, Contractors</td>
<td>5 3 15 High</td>
<td>Office use shall be restricted, given the above conditions and the below considerations:</td>
<td>2 3 6 Medium</td>
</tr>
</tbody>
</table>

- Increased cleaning regime by cleaning contractor, focussing on surfaces people touch - "hot spots" - desks, doors, counters, taps, switches, buttons etc.
- Provision of hand sanitiser at strategic locations (e.g. access/egress points)
- Desk sharing shall not be practiced
- Same desk must not be used by different individuals in the same work day
- Desk cleaning prior to use by the next person
- Consideration is being given to anti-bacterial door handles/push plates for main entrance doors and fire doors
- Individuals to bring their own keyboard and mouse to site - only monitors and laptop docking stations can be left on desks
- Sanitising wipes are available across the office to clean down monitor and docking station buttons before and after use
- Good hand hygiene must be maintained
- Canteen areas remain off limits for communal eating of meals/breaks, but making of/collecting drinks remains available, with due to regard to >2m distancing and cleaning regimes
- Meeting rooms remain off-limits, with the following caveats:
  1. Single use of the rooms by someone who needs to conduct a private phone call; no-one else to enter the room whilst in use
  2. Meeting Rooms 1 or 2 used by a Mental Health First Aider to hold a discussion with someone seeking their support. A maximum of those 2 people in the room, with at least 2 metres distancing, and no-one else to enter the room whilst occupied
  3. Meeting room 3 is used for the Siemens Real Estate-defined "Isolation room" as per current procedure

The building landlord (Knight Frank) will also have additional controls and signing in place, in the communal areas of Maple House - the car park, Ground floor, floors 1 and 2, and the toilet/communal areas at the front and back of floors 3 and 4. Please observe any such additional requirements - further information regarding these areas is in the final section of this assessment.

What is the Effect (Risk) from the hazard?

- Reception, ground floor, area:
  - Occupiers must maintain a 2m distance at all times from the Reception team. Signage and floor markings will be in place to notify of this. The Reception team will be provided with PPE. A Perspex screen will be in position at the reception desk to accommodate visitors who may require closer communication with the reception team. Hand sanitiser will be in place within reception, occupiers are encouraged to use this when entering the building.

- Lifts:
  - Whilst social distancing is recommended, if you cannot maintain a two metre distance with other people in the lift then be patient and wait for the next one, or consider taking the stairs instead if you can. Ideally it’s best to travel in the lift/elevator cabin on your own or at most with one other person to limit the spread of infections through respiratory droplets. Whilst in the lift you may want to continue to wear a face mask in order to prevent airborne contamination. Run rates and weight limits may also be employed in order to prioritise and police social distancing.

- Stairwell:
  - At all times there should be a 2m or 8 step distance between you and another person (this equates to roughly a half flight of stairs - from landing to intermediate landing).

- WCs:
  - In order to maintain a 2m distance we may close off some urinals, Wash-hand basins and hand-dryers where possible to ensure social distancing measures are being met. Occupiers are asked to close the toilet seat before flushing. Scientists have warned that particles spread through flushing could pose a risk of virus transmission.

- Car Park:
  - Social distancing measures will apply within the site car park. Please be mindful when accessing and egressing these facilities. Zoono will be applied to intercoms, proximity readers and touch points to ensure these areas are sanitised for motorists and cyclists using the car park facilities daily.

- Cycle Store:
  - Occupiers using the cycle facility are asked to maintain social distancing with other users. Where possible every other bicycle rack will be closed to maintain social distancing. Hand sanitiser will be available at the cycle store facility for occupiers to use.
