## HiMed Cockpit

The Professional Multimedia Tablet Cockpit 18 pro+

The Cockpit 18 pro+ is the professional multimedia tablet at the patient's bedside. It combines highest patient comfort with the plus for hospital processes.

The multimedia tablet offers patients outstanding performance and brilliant presentation of the extensive entertainment services. The ergonomic and patient-friendly operation via touchscreen and capacitive, tactile function keys enables easy use for all patients: whether menu ordering, light control or patient education - all services can be operated intuitively and conveniently via a customer-specific interface.

The integrated camera enables patient authentication and video communication inside and outside the hospital. The secure RFID technology supports hospital processes for staff and patients.

A wide range of mounting systems enables simple and variable integration in the patient's room. The cockpit offers the hospital a future-proof IT system at the patient bed.

Income from the services offered and the optimization of processes through app integration improve the efficiency and attractiveness of the hospital.
