

Sifinity Control:

The heartbeat of your charging infrastructure

Sifinity Control is the integrated software solution for Siemens charging infrastructure. Benefit from real-time monitoring, instant insights, and peak performance.

2-year license included
with SICHARGE D and
SICHARGE FLEX chargers

You know the pain – **so does Sifinity Control**

Downtime means lost revenue until a technician arrives. More chargers generate more data, but without actionable insights, issues go unnoticed. Maintenance visits increase costs and extend downtime. Slow deployment delays revenue generation, while limited customization restricts branding opportunities and new revenue streams.

Sifinity Control turns these challenges into solutions

Turn data into educated actions

No more guesswork! Sifinity Control tells you when and how to act.

Customize for your use case

Adapt your charger to your needs. From branding to integrated ads.

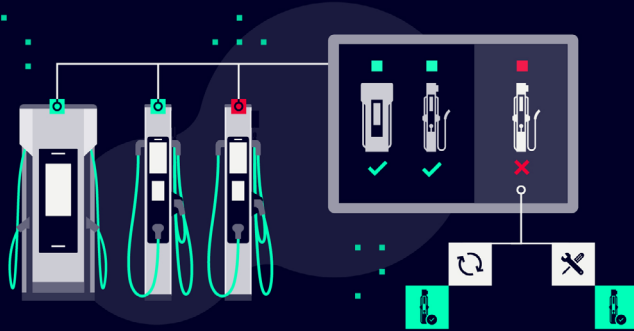

Access all chargers anywhere, anytime

No matter where you are, no matter where you operate your charger. Configuration and updates have never been easier – for all chargers at once.

Extend your team with Siemens experts

Benefit from service agreements that help keep your charging infrastructure available, maintained, and performing at its best.

Monitor and solve

Get a full overview of your charging network's health. Spot and solve most issues remotely, with diagnostic data and spare part recommendations ready if a technician is needed.

Manage data efficiently

Centrally configure and update your entire Siemens charging infrastructure at once, from customer settings to payment options.

Strengthen your brand

Add your logo, colors, and screensaver to the interface, and unlock new revenue through integrated ads.
