

Transform mobility for everyone

Today, transport providers face multiple challenges to move more people and goods on tracks. At Siemens Mobility, we enable our customers worldwide to realize sustainable mobility solutions. As a leading technology company, we combine the real and digital worlds like no other in rail.

In an open ecosystem, we bring together rolling stock, rail infrastructure, rail services, and software to provide sustainable, comfortable, and cost-effective rail traffic today. Together with our customers and partners, we move people and goods seamlessly and transform mobility for everyone.

We combine technologies from the real and digital worlds for **sustainable, comfortable and cost-effective rail traffic.**

Optimized lifecycle costs for rail infrastructure and rolling stock

100% system availability

Maximized network capacity

Optimized customer experience and processes

Our Portfolio

Rolling Stock

Short-distance, regional and long-distance rolling stock, product and system solutions for passenger and freight transport

Customer Services

Services for rolling stock, rail infrastructure and turnkey systems, throughout the entire lifecycle

Rail Infrastructure

Products and solutions for rail automation and electrification for mainline, freight and mass transit

Turnkey

Complete rail solutions from project management to system integration of the entire rail portfolio and beyond

Software

Software for train planning, inventory, reservation and ticketing, and Mobility-as-a-Service (MaaS)

Rolling Stock

Is a global supplier of **rolling stock and system solutions**

Locomotives
and Coaches

Commuter
and Regional

Metros

Components

Light Rail and VAL

Customer services

provides services for rolling stock and rail infrastructure throughout the entire lifecycle, **giving rail traffic a powerful and reliable basis**

How we transform mobility in the **Middle East and Africa**

The **world's longest** driverless metro in Riyadh

This massive public transit initiative supports the city's rapid growth and the country's 2030 vision

Electrification and maintenance of Metro Al Mashaer

It's the highest capacity metro line in the world with 72,000 passenger movements per hour

First cross-border rail project in the Arab world: Abu Dhabi-Sohar signaling

The new 238 km line significantly reduces travel time within the GCC, and enhances our position as an ETCS pioneer

2000 kilometer long **high-speed rail** project in Egypt

Anticipated to be the sixth-largest high-speed network in the world that will be accessible to 90% of the Egyptian population in 60 cities

Velaro **high-speed trains** in Türkiye

19 Velaro trains have achieved a total mileage of 35 million kilometers and transported over 33 million passengers since 2015

A unique tram system: Education City, Qatar

A network without overhead contact lines; 19 Avenio trams that have received multiple design awards; and project that includes signaling, depot workshop equipment, operation and maintenance

Siemens Mobility **Saudi Arabia**

Key Highlight in Saudi Arabia:

The First project of its kind in the Kingdom of Saudi Arabia, Siemens Mobility successfully delivered **Riyadh Metro Line 1 (Blue) and Line 2 (Red) with the BACS consortium.**

With the increasing mobility demands, the Riyadh Metro serves as the foundation of the city's public transportation network, delivering accessible and efficient transportation for all residents and visitors.

The World's longest driverless metro network, 176km long and 85 stations across the city.

Length of 176km

Inaugurated in December 2024, the network safely served over 100 million passengers in less than 9 months, easing congestion and improving connectivity across the city through efficient and sustainable solutions dedicated to the Kingdom's circular carbon economy.

Including 67 Siemens Inspiro trains, the metro vehicles have been engineered to thrive in the city's extreme climate, featuring latest Passenger Information Systems and high-capacity air conditioning systems that ensure comfortable travel, even in extreme heat.

About us in Saudi Arabia:

Local Presence, Global Expertise

Siemens Mobility Saudi Limited
The Business Gate, Building D1
Zone D – 1st floor,
Airport Road, Qurtubah District
