

JUNE 17, 2021 | 1:00 – 4:00 PM EST

Executive Cybersecurity Forum for Electric Power

The program – Join us live!

1:00 – 2:00 pm (EST)

Keynote: The changing landscape for Electric Utilities – security risk mitigation.

Manny Cancel serves as NERC senior vice president and chief executive officer of the Electricity Information Sharing and Analysis Center (E-ISAC). Mr. Cancel leads security operations and information sharing, threat intelligence and analysis, and stakeholder engagement initiatives designed to protect critical electricity infrastructure in North America.

2:00 – 3:00 pm (EST)

Expert Panel Discussion: How can Electric Utilities mitigate risks of cyber threats, sabotage and accidental manipulation with security by design and operationalization of cybersecurity?

- David Ball, Managing Director, Transmission Operations (American Electric Power)
- John Biasi, Senior Consultant – Governance, Risk, Cybersecurity & Compliance (Burns & McDonnell)
- Andrea Brackett, VP of Cybersecurity, Technology and Innovation (Tennessee Valley Authority)
- Phil Tonkin, Global Head of Cyber Operational Technology (National Grid)

3:00 – 4:00 pm (EST)

Presentation: Maximizing cyber standards to secure your OT environment.

- Examples of cybersecurity measures to design and operationalize – what they are and how to implement.
- Compliance approach. Effective cybersecurity will lead to compliance. Set goals accordingly!
- Security by design, operationalization of cybersecurity, and compliance - how to start.
- The importance of choosing solutions manufactured for security (certified as IEC 62443 / IEC 61850)
