To remain competitive in the long term, machines and plants must be continually adapted to the latest requirements.

If your automation system is no longer state-of-the-art, it is time to consider modernizing it and prepare for a digital plant. We will support you with your individual project up to a complete modernization service.

Optimize your machines and production plants efficiently, by converting to the latest SIMATIC technologies:

- Save time by simulating the automation system during production
- Cost and time savings using IO adapters instead of costly rewiring
- Increase competitiveness thanks to integrated system features, plant availability and efficiency in production
- Reduce downtimes and correct faults faster with integrated system diagnostics
- Professional support worldwide – adapted to your specific requirements

Good reasons for modernization ...

Migration  Compact  Faster  Better value  Productivity

... face the future with more productivity.
Step-by-step into the future

Siemens offers you comprehensive information for converting to the latest SIMATIC technologies. Many tools are available on the Internet – for the most varied topics and tasks:

- **Documentation**: Migration and conversion guides
- **Hardware**: Module type conversion
- **Software**: Integrated and external program converter
- **IO conversion**: IO adapters
- **Communication**: Example projects
- **Trainings**: SITRAIN migration training

Plan your migration strategy – for detailed information, visit: siemens.com/tia-migration

In addition, we also offer you personalized support on request – precisely tailored to your specific challenges:

- **Advance clarification and testing of the core functionalities**
  via your Siemens contact: siemens.com/industry/contact
- **Complete service**
  from consulting, through implementation, right up to full project completion within the scope of our migration services

Your individual migration support – for more information: siemens.com/fa-services

Your advantages at a glance

- **Higher productivity, overall efficiency and usability**
  All-in-one solution, where SIMATIC Controllers, SIMATIC HMI and SINAMICS Drives work optimally together – configured in the TIA Portal
- **Technological progress included**
  Fulfillment of latest manufacturing standards, machine safety requirements, and industrial security requirements
- **Minimized downtimes**
  Integrated fault diagnostics and detailed display of faults help to identify faults fast, minimize downtimes and increase productivity
- **Increased profitability**
  Global long-term availability of all Siemens components
- **Improved competitiveness**
  Efficient use of a powerful SIMATIC automation system of the latest generation
- **Be future proof**
  The latest SIMATIC Controller generation together with the engineering framework TIA Portal offers the perfect entry into digitalization
