Ingenuity for life

Motor starter SIMATIC ET 200SP

Versatile. Powerful. Space-saving.

[siemens.com/et200SP-motorstarter](https://www.siemens.com/et200SP-motorstarter)

Optimum protection for your motors and loads

The SIMATIC ET 200SP motor starter with its safety and standard function now completes the distributed I/O system. It features impressive outputs of up to 5.5 kW and a compact width of just 30 mm. Not only do you save space in the control cabinet, you also benefit from the starter's versatility when monitoring your plant.

Good reasons for choosing the ET 200SP motor starter:

-  Wide performance range for motors up to 5.5 kW
-  High degree of flexibility for safety applications thanks to shutdown via SIMATIC F-CPU or SIRIUS 3SK safety relay
-  Economic flexibility due to low variance
-  Lower plant costs thanks to quick installation and wiring
-  Easy module interchangeability means increased plant availability
-  More space in the control cabinet thanks to a module width of just 30 mm
-  Faster configuration in the TIA Portal
-  Rapid maintenance thanks to automatic parameter uploading

The combination of compact design and hybrid technology makes the motor starter especially powerful – with four setting ranges up to 5.5 kW. Selected module variants, which still cover 80% of all motor applications, mean that you remain economically flexible. When starting single-phase and three-phase motors, the motor starters provide reliable overload and short-circuit protection. In addition, you benefit from the transmission of current values which can be used for energy management functions.

Motor starters up to 5.5 kW. Only 30 mm wide.
Also suitable for safety-oriented applications.

Simple installation ▶
Thanks to push-in technology.

Hybrid switching technology ▶
Durable and energy-saving, since
relay contacts are
not subject to loading.

Safety Integrated ▶
Versatile safety solutions:
shutdown via SIMATIC F-CPU or
SIRIUS 3SK safety relay.

Quick stop and limit position disconnecter ▶
Load switch off even at high speed –
independent of central controller.

Power bus ▶
Automatic setup with side-by-side
mounting of multiple modules.

- 
- ▼ **Wide range of performance**
For motors up to 5.5 kW.

- ▼ **Extended functionality**
Thanks to safety functions
at no extra charge.

- ▼ **Rapid installation**
Hook in, slide into place
and engage.

- ▼ **Option handling**
Enhanced flexibility and optimized
savings due to one-off configuration
of complex automation projects.

- ▼ **Space requirements reduced by up to 50%**
Just 30 mm wide, it is much slimmer
than other distributed I/O systems.

Once it is installed and wired, you simply connect the ET 200SP motor starter to the controller in the TIA Portal ready for parameterization.

Just 16 motor starter variants – easy to select and order

| Motor starter modules | Operating output* | Response value** | MLFB |
|----------------------------------|-------------------|------------------|--------------------|
| Direct-on-line starter | 0.25 | 0.3 ... 1 | 3RK1308-0AB00-0CP0 |
