-35° to 50°C / -31° to 122°F

Maximum ambient temperature:

55°C / 131°F

Weather rating:

NEMA Type 3R
Operating instructions

Charging your car with the VersiCharge Ultra 50 fast charger is safe, secure, and easy to do with industry standard plugs and a simple interface that guides you through the charging process.

The VersiCharge Ultra 50 fast charger offers two different charging plugs, the CHAdeMO and the Type 1 Combined Charging Standard (CCS).

Activation security

The VersiCharge Ultra 50 is designed to activate and secure your individual charging session through card recognition, application (APP), or Short Message Service (SMS).

After activation and authorization is recognized, you have a certain timeframe to begin your charging session.

Using the interface panel

The top half of the panel has icons and buttons that control the charging session.

The icons either visually flash on and off to prompt an action or selection, or show as a solid light to indicate the current mode.

The lower half of the panel displays charging information.

At certain times you hear audio feedback to assure you that certain functions are successful.

Different models have different graphics.

The minutes shown on the display show how long your car has been charging.

You will have ample time to make your selections; however, if the charger has been idle for too long without making a selection, it returns to being available for other users. See Operating Instructions below.

At any stage, return the plug to the VersiCharge Ultra 50 plug holder to end your charging session.
Operating Instructions

The interface panel

1. Connect plug to car
   Icon flashes when the unit is available for use.

2. Activation
   Swipe your card over this area or use your APP or SMS to activate the user interface, and to also unlock a charging session.

3. MAX or %
   Toggle button may allow selection between the % indicated and the maximum charge amount.

4. Start
   Push to start the charging session.

5. Stop
   Push to stop the charging session.

6. Return plug to charger
   Flashes when the charging session is complete and the plug should be returned to the plug holder.

7. Not in service
   Icon is lit when the charger is not in service.

8. Locked symbol
   Lit when a charging session is in progress and the interface panel is locked.

9. Charging indicator
   Glows when a charging session is in progress.

10. LED information displays
    Displays minutes, battery percentage during charge, kilowatts delivered, fee charged.

Emergency stop

In case of emergency, press the Emergency Stop button to shut down and secure the VersiCharge Ultra 50.
