

Siemens smart buildings portfolio accredited by WiredScore

- **Siemens smart buildings portfolio, including Building X, recognized as Accredited Solutions by WiredScore**
- **WiredScore sets a global standard for technology in the built world**
- **SmartScore certification by WiredScore supports global investors and building operators to implement smart, connected buildings according to highest industry benchmarks and tenant expectations**
- **Accreditation underlines Siemens' commitment to support customers in achieving smart and future-proof buildings**

Siemens Smart Infrastructure's smart buildings portfolio, designed to help building owners create healthy, comfortable, and sustainable buildings – whether greenfield or retrofits – has been recognized by WiredScore's Accredited Solutions. The accreditation for smart solution providers is granted by WiredScore, a US-based company that sets a global standard for technology in the built world through certification and education.

One of the Accredited Solutions is Building X, a scalable digital building platform. It supports customers to digitalize, manage, and optimize building operations, allowing for enhanced user experience, increased performance, and improved sustainability. Others include Siveillance, a software-based security portfolio as well as Desigo CC, an integrated building management system. They are all part of the Siemens Xcelerator portfolio.

The accreditation acknowledges Siemens' continued efforts and investment in meeting global standards for smart buildings in terms of user functionality and technological foundation. It also highlights its strong commitment to sustainability,

efficiency, and future adaptability, creating value for building owners and operators globally.

“We are delighted that Building X and our wider smart buildings portfolio have been recognized under WiredScore’s Accredited Solutions program. This underlines our commitment to improving people’s health, comfort, and safety in the built environment, and to deliver on building performance and sustainability needs of our clients. Our goal is to combine the real and the digital worlds in real estate through our accredited range of solutions, and deliver tangible business outcomes for our customers,” said Henning Sandfort, CEO Building Products at Siemens Smart Infrastructure.

Laura Hancox, Director of Partner Programs at WiredScore, commented: “We are delighted to be working in close partnership with Siemens across their Siemens Xcelerator portfolio. To be recognized by our Accredited Solutions program demonstrates their commitment as part of a wider, industry-wide effort to provide buildings that are future-ready and suitable for the needs of the modern workforce.”

WiredScore launched the Accredited Solutions program to recognize leading technology providers with a demonstrated track record of delivery for smart buildings that achieve great user experience, cost efficiency and sustainability. Providers are mapped against the SmartScore scorecard based on their ability to deliver best-in-class outcomes for owners, operators, and users.

Siemens Smart Infrastructure (SI) is shaping the market for intelligent, adaptive infrastructure for today and the future. It addresses the pressing challenges of urbanization and climate change by connecting energy systems, buildings and industries. SI provides customers with a comprehensive end-to-end portfolio from a single source – with products, systems, solutions and services from the point of power generation all the way to consumption. With an increasingly digitalized ecosystem, it helps customers thrive and communities progress while contributing toward protecting the planet. Siemens Smart Infrastructure has its global headquarters in Zug, Switzerland. As of September 30, 2022, the business had around 72,700 employees worldwide.

Siemens AG (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, helping them to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power.

In fiscal 2022, which ended on September 30, 2022, the Siemens Group generated revenue of €72.0 billion and net income of €4.4 billion. As of September 30, 2022, the company had around 311,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
