Supervisory Board report

The Siemens Nederland N.V. Supervisory Board oversees the Management Board's policies and assists the Management Board with advice. The Supervisory Board holds regular meetings together with the Management Board.

At these meetings the Board discusses day-to-day business and the results achieved compared to the approved budget on the basis of financial reports. Developments in the Siemens Group in the Netherlands are also discussed, along with potential acquisitions and carve-outs. The business outlook, all reportable events, financial reporting and Enterprise Risk Management including Environment, Health & Safety as well as Cybersecurity are covered. Besides these, important developments related to personnel and past and future social policy are exchanged. The sustainability policy and digitalization are furthermore also recurring topics of discussion.

The Audit Committee assists the Supervisory Board in fulfilling its supervisory responsibilities with regard to the entire financial reporting process, the independence and qualifications of the independent external auditors, the system of internal control, the governance process, and the company's process for monitoring compliance with the law, Siemens' internal regulations and applicable codes of conduct.

As a rule there is always a member of the Supervisory Board present at the consultation meetings with the Works Council.

We thank the Management Board and all employees for their efforts and commitment during the past year.

The Hague, 16 December 2022 Supervisory Board Siemens Nederland N.V.

C. Kaeser, Chairman

Report of the Management Board

Herewith we present the annual report of Siemens Nederland N.V. as of 30 September 2022, which has been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union as well as with Part 9 of Book 2 of the Dutch Civil Code.

Our mission and strategy

As a focused technology company, Siemens combines the real and the digital world and helps customers to meet the great challenges of our time. Sustainability is an integral part of our business – it's in our DNA. We empower our customers to drive sustainable growth and transform their industries. Every day, Siemens creates impact by providing innovative solutions tackling challenges in the areas of environmental protection, decarbonization, health and safety. Innovative solutions that have one clear goal: making the world a more livable, sustainable and inclusive world.

In the Netherlands, the Siemens brand is supported by a strong ecosystem counting approximately 2,800 Siemens employees, including the entities of Siemens Mobility, Siemens Healthineers and Siemens Digital Industries Software.

As part of this ecosystem, Siemens Nederland N.V. continues its efforts to become a digital champion in the industrial and infrastructure world. This is driven by combining the digital and physical world and supported by the strong presence of our hardware and software portfolio entities in the Netherlands. Leveraging the innovation power of the Netherlands we will continue to support the Dutch industry and infrastructure markets in their transformation towards a more digitalized economy.

Siemens Nederland N.V wants to be a trusted partner for all our stakeholders. Our focused approach in defined market segments is recognized and we are proud that Siemens Nederland N.V. is nominated by its customers as a finalist for the 'Dutch Industrial Suppliers and Customer Awards (DISCA) 2022' in the category 'Best Knowledge Supplier'.

Organizational structure

Siemens Nederland N.V. is a wholly owned subsidiary of Siemens International Holding B.V., ultimately owned by parent company Siemens AG, with its registered office in The Hague and forms part of the fiscal unity headed by Siemens International Holding B.V. All parties in this fiscal unity share joint and several liability with respect to Dutch Corporate Income Tax. The Company also forms a tax group with its parent company for value added tax (VAT). Siemens International Holding B.V. is indirectly a wholly owned subsidiary of Siemens AG, with its head offices in Berlin and Munich. The Management Board of Siemens Nederland N.V. consists of two members: Dirk De Bilde (CEO) appointed as per March 2020 and Daniel Kusch (CFO) appointed as per April 2020.

Divestment of Commercial Vehicles (CV) business

In May 2022, Siemens AG has announced its plans to sell its global Commercial Vehicles business to Meritor. The move is another step in the Company's rigorous implementation of its previously announced plan to sharpen its portfolio as a focused technology company. Commercial Vehicles is part of Siemens' Portfolio Companies Unit. Siemens Nederland N.V. employs one employee in this business. Local employee representatives have been informed and will be involved in accordance with the national legal framework. For our P&L statement and Balance sheet, the sale will have a low impact (Net income EUR 0.5 million, Assets EUR 2.2 million and Liabilities EUR 0.8 million) and is not considered as a significant activity according to IFRS 5. Consequently these figures are not represented separately as discontinued operations.

Financial information and developments

Siemens Nederland N.V. closed the year with revenue of EUR 536.9 million (2021: EUR 505.4 million), which represents an increase of 6% compared to last year and an operating profit margin of around 8%. Both our Smart Infrastructure business (SI) and our Digital Industries business (DI) grew in fiscal year 2022 - also driven by successes in their export businesses (e.g. data centers and cranes). Profit after tax increased to EUR 30.3 (2021: EUR 28.2 million). Total assets increased slightly by 3% (EUR 9.3 million) compared to prior year, which was mainly driven by an increase in receivables and prepayments following the growth of business, while non-current assets (right-of-use assets/ financial assets) reduced considerably.

The solvency ratio, defined as equity / total assets, at 30 September 2022 remains very strong at 48.2% (2021: 49.1%) before profit distribution. Siemens Nederland N.V. intends to distribute its annual profit of EUR 30.3 million for fiscal 2022 as a dividend. No major changes in the funding structure of the Company are expected next year. During the reporting period no major investments and Research & Development activities were performed within the Company.

Future perspective

Historical high inflation rates, shortages in the supply chain, shortage in skilled people, the war on the European continent and an accelerated decoupling in world trading put a serious damper on consumer and business confidence, which are both historically low. Several countries within the EU might go through a recession in 2023 with impact also on the Dutch economy. On top of this the Dutch economy has to deal with a tight labor market. We believe that as a company we can support in these challenges by playing a leading role in the digitalization of the industry and the energy transition.

For its outlook for fiscal year 2023, Siemens Nederland N.V. assumes a cooling down of new orders especially in our short cycle business. For our business related to the governmental programs like the energy transition, we see opportunities to accelerate. Thanks to our order backlog, built up over the last year, we expect an overall growth of revenues in the range of 20 - 25% next year and an operating profit margin of around 7% of revenue.

Portfolio of business activities

Digital Industries (DI)

The advancing digitalization, in tandem with the increasing flexibilization of production processes, provides new opportunities and choices for industrial companies all across the globe. Digital Industries supports our customers in unlocking the full potential: as a partner providing cutting-edge technologies for the automation and digitalization of the discrete and process industries. The Digital Enterprise portfolio is at the core of our offer. Together with our vertical domain know-how we provide companies of all sizes with consistent solutions, services and products for the integration and digitalization of the entire value chain. As an innovation leader, we think ahead to the next level of digital transformation and integrate cutting-edge technologies such as artificial intelligence, edge computing, industrial 5G, autonomous handling systems, blockchain and additive manufacturing into our portfolio. In addition to a more focused go to market approach where customer centricity is key, we are also taking a next step in collaborating in ecosystems together with our stakeholders supported by our Siemens Xcelerator platform, which is a new, open digital business platform featuring a curated portfolio of IoT-enabled hardware and software, a powerful ecosystem of partners, and a marketplace.

Smart Infrastructure (SI)

Smart Infrastructure intelligently connects energy systems, buildings and industries to adapt and evolve the way we live and work. We work together with customers and partners to create an ecosystem that intuitively responds to the needs of people and helps customers to better use resources. It helps our customers to thrive, communities to progress and supports sustainable development. We do this from the macro to the micro level, from physical products, components and systems to connected, cloud-based digital offerings and services. From intelligent grid control and electrification to smart storage solutions, from building automation and control systems to switches, valves and sensors. We create environments that care.

Sustainability and transparency

At Siemens, sustainability is an integral part of our business – it is part of our DNA. The ESG commitment of Siemens AG is laid down in our DEGREE framework, a 360-degree approach for all stakeholders – our customers, our suppliers, our investors, our people, the societies we serve, and our planet. In addressing the three aspects of ESG, we are building a better future that helps us stay within the planetary boundaries, helps us foster a culture of trust, empowerment and growth, supports inclusive economic opportunities, and ensures our people and businesses remain resilient and relevant for whatever the future holds.

We have defined clear and ambitious priorities that we will drive internally within own operations as well as together with our customers and suppliers. The DEGREE framework is built on our strong track record and on our 'technology with purpose' that is fully embedded in our business strategy. At Siemens, we want to advance sustainability by creating value for all our stakeholders, driving sustainable growth with our customers, and creating a better tomorrow. For our own operations we have defined action plans on all focus topics within the DEGREE framework: Decarbonization, Ethics, Governance, Resource Efficiency, Equity and Employability, which will support Siemens to comply with the Corporate Sustainability Reporting Directive (CSRD) requirements as of fiscal year 2024.

Among other targets we highlight our ambition to have net zero operations by 2030 and net zero supply chain by 2050, whereby we strive to have a 20% emission reduction already in 2030. Further we go for zero landfill waste by 2030. On employability we stimulate our employees in a continuous growth mindset and drive this culture by dedicated programs in digital learning.

These targets are just a continuation of our vision: Technology with purpose, how we can improve quality of life while using fewer resources. During our more than 140 years of presence in the Netherlands we are proud on how we did contribute on the development of the society. An overview and the progress on the DEGREE targets can be found in our Business to Society report for the Netherlands which is available at www.siemens.nl.

Diversity

At Siemens we strive to transform the everyday for our customers, employees and society. Committing to this transformation also means committing to Diversity, Equity & Inclusion (DEI). Through Equity we ensure everyone has access to the same opportunities and is treated fairly. And Inclusion is how we actively empower the voices of each and every individual. Within the Company we have launched a program to facilitate our efforts, consisting of four workstreams: i) Women in Leadership, ii) Culture, iii) Talent Acquisition and iv) Communication.

At the start of fiscal year 2022 we gave ourselves a gender diversity target to have at least 13% female hires in business functions by the end of fiscal year 2023. In 2022 this percentage reached 17.4% (2021: 7.9%).

Furthermore we have formulated the ambition to reach a 22% share of women in the (sub) top of the Company by the end of fiscal year 2023. With an actual share of 21.1% at the end of fiscal year 2022 (2021:17.5%) we are well on track.

The focus on gender diversity and all related actions led to a significant increase in the total number of women hired in 2022. Overall 23.6% of all new hires in 2022 were female (2021: 12.0%).

Risk management

Since Siemens operates in an increasingly complex and accelerating business environment which is subject to ongoing change, and as such will inherently face risks and opportunities, Siemens' ability to effectively deal with risks and opportunities is a major factor in creating and protecting value for our stakeholders. Siemens Nederland N.V. is also subject to several risks in its daily activities, which are classified as strategic, operational, financial or compliance risks. Reliable risk management is crucial to control these risks, since it allows Siemens Nederland N.V. to identify potential problems before they occur so that risk-handling activities may be performed as needed to mitigate adverse impacts on achieving objectives. On a regular basis, based on a systematic approach, management reviews and classifies risks in terms of likelihood and impact on business objectives, media, regulatory bodies, management time and financial impact.

Risk profile

Siemens Nederland N.V. is prepared to take moderate risks to realize its ambitions in our markets but has a very low appetite to risks that would negatively impact our reputation, our customers, ESG (Environmental, Social & Governance), business continuity or information security. Due to the very nature of part of its business it may have a moderate appetite for project management risks which apply to a certain type of projects (such as new technology). Siemens Nederland N.V. requires full compliance with all applicable national and international laws and regulations. Governance, assurance and risk management are all key elements of Siemens' risk and internal control system.

Identified risks

During fiscal year 2022 no risks occurred which required changes in the risk management process. For fiscal year 2023 we assume that challenges from COVID 19 and supply chain constraints continue to ease. Based on the latest risk review as of 30 September 2022 the risks with a high level of exposure in the different categories were:

Strategy and competitive environment:

The markets for our products, solutions and services are highly competitive and we face strong competitors in several markets which may result in a change in our relative market position. Other factors that impact our market are decoupling of major established players like e.g. the US and China, the shortage of energy and the shortages in the supply chain. We address these risks with various measures, for example benchmarking, strategic initiatives in the eco-system with customers and suppliers, executing productivity measures and target cost projects, rightsizing of our footprint, outsourcings and optimizing our product portfolio. We continuously monitor and analyze competitive and market information in order to be able to anticipate unfavorable changes in the competitive environment rather than merely reacting to such changes.

Disruptive technologies:

The markets in which our businesses operate experience rapid and significant changes due to the introduction of innovative and disruptive technologies. In the fields of digitalization there are risks of new competitors, substitutions of existing products / solutions / services, niche players, new business models and finally the risk that our competitors may have faster time-to-market strategies and introduce their products and solutions faster than Siemens. Our operating results depend to a significant extent on our technological leadership, our ability to anticipate and adapt to changes in our markets and to reduce the costs of producing our products. Siemens constantly applies for new patents and actively manages our intellectual property portfolio to secure our technological position. However, our patents and other intellectual property may not prevent competitors from independently developing or selling products and services that are similar to or duplicate of ours.

People and competencies:

Future business models require highly skilled personnel with (technical) expertise and capabilities to support profitable growth. Bringing the Siemens organization and employee competencies in line with future demands and at the same time push forward the acceleration of our performances (e.g. in terms of new commercial models, cross-industry collaboration and agility) is challenging and might result in resource shortages in mid-/long-term which may result in lack of profitable growth. Siemens tackles these challenges by focusing on these (technical) skills in combination with a growth mindset in both local and international recruitment-, retention- and development-programs and by coordinating with respective group verticals to ensure that NL-based activities are aligned with central/global strategies.

Project management:

Professional project management is very important to Siemens, because a substantial proportion of its revenue is generated through projects. Customers also expect that the projects are managed in an excellent, innovative, and responsible manner. To meet this expectation, Siemens has implemented a globally harmonized system:

PM@Siemens. This is a collective name given to a range of activities aimed at improving project management within Siemens. Examples of these activities include process improvements, assessments, and training. One of the focus areas of PM@Siemens is the use of best practices. The aim is to harmonize the standards for good project management and to implement and promote them within the organization.

Cyber security:

Due to, amongst others, digitalization, availability of data, mobile working and interconnectivity, sensitive information is shared and processed more widely and becomes increasingly vulnerable for (sophisticated) cyber security threats. This may result in unwanted disclosure of (competitive) confidential information, manipulation of and/or unavailability of data and IT related (customer) services. As a countermeasure, a local cyber security action plan has been established and is implemented under close supervision of local senior management. Our level of alertness is increased since the conflict of the western countries with Russia might result in increased cyber security attacks on critical infrastructure of Siemens and/or its customers.

Changes of laws, Codes and Standards :

If not dealt with or implemented adequately can lead to non-conformances (fines, limitations, legal cases, negative exposure). Siemens Nederland N.V. has assigned local governance owners, who review changes of laws, legislation, codes and standards. In addition, it makes use of databases and experts to support implementation. A special area within this risk is the regulation and governance of digital business. This risk will be addressed by following the European Regulations that apply for the Netherlands as well, application of form and substance of the contracts that are defined on Corporate level and closely monitoring of local case law.

Compliance / Anti- corruption, adherence to law

Siemens promotes integrity and acting in accordance with our values and allows zero tolerance for corruption and violations of principles of fair competition. The Siemens compliance system is divided into 3 action levels: Prevent, Detect and Respond. These action levels encompass a comprehensive system of activities by which Siemens intends to ensure business in full accordance with applicable laws and regulations as well as Siemens' internal principles and rules.

Notes to the company financial statements

General disclosures

The financial statements of Siemens Nederland N.V. (hereafter "the Company"), having its legal seat in The Hague, the Netherlands, as of 30 September 2022 were adopted by its General Meeting on 16 December 2022 and will be filed with The Chamber of Commerce, The Hague under registration number 27015771.

The Company. focused its activities in fiscal year 2022 on two Businesses namely Digital Industries (DI) and Smart Infrastructure (SI). The portfolio includes products, systems, installations and services. The Company has approximately 1,100 employees. It forms part of a tax group led by its parent company, Siemens International Holding B.V. All members of this group are jointly and severally liable for the taxes payable by the tax group.

Unless stated otherwise, all amounts are in millions of euros.

Accounting policies

(1) Basis of preparation

(1.1) Declaration of conformity

The company financial statements of Siemens Nederland N.V. have been prepared in accordance with the International Financial Reporting Standards as adopted in the European Union as of 30 September 2022 (IFRS) applicable to fiscal year ended as of 30 September 2022.

(1.2) Measurement basis

Unless stated otherwise, the company financial statements have been prepared on the basis of historical cost, with the exception that derivative financial instruments are measured at fair value and any changes in value are recognized in the income statement; the methods for determining fair value are explained in more detail in note 4.

The financial statements are presented in euros, the Company's functional currency.

(2) Significant judgments, estimates, and assumptions used in this report

The most important assumptions about the future and other significant sources of uncertainty associated with estimates as of the reporting date, which entail a major risk of substantial adjustment to the carrying amounts of assets and liabilities in the next fiscal year, are presented below.

Pension and other post-employment benefit plans

The costs of post-employment defined benefit plans are determined based on actuarial methods. The actuarial methods comprise assumptions made about discount rates, expected returns on plan assets, future salary increases, mortality rates, and the future indexation of pension payments. Because of the long-term nature of these plans, such estimates are subject to significant uncertainty. The estimate at the beginning of the fiscal year determines the net periodic cost of the fiscal year. At the end of the fiscal year, the amount of the pension provision is recalculated based on actual figures for the year ended and adjusted actuarial assumptions about the future. After this recalculation, differences in the net obligation as a result of adjustments to assumptions and/or variations in estimates are added to pension provisions and the corresponding expense or income recognized directly in equity (actuarial gains or losses). The defined benefit arrangement only relates to an

executive management plan without active participants, since it was discontinued in the prior fiscal year. See note 19 for further information.

Revenue recognition for projects

A significant portion of the company's revenue is generated in long-term projects. Revenue is recognized in line with the stage of completion of the project in process. For each project, the total revenue to be generated is determined, based on contract value. In addition, the total costs to be incurred to complete the project are estimated. During the project, project revenue is recognized based on the ratio of costs incurred to total expected costs. In doing so, only progress-relevant costs are taken into consideration. Revenue is not recognized for costs that are temporarily not progress-relevant, but these costs are presented as prepayments in the statement of financial position. Costs that are permanently not progress-relevant are directly charged to the income statement without recognizing revenue. The estimation element of the cost-to-cost variant of the percentage of completion method requires estimates and continual updates of the total expected costs.

(3) Accounting policies

(3.1) Goodwill

Goodwill, which arises during the acquisition of equity interests and/or independent business units, is the amount by which the cost of the business combination exceeds the acquirer's interest in the net fair value of the identifiable assets, liabilities, and contingent liabilities.

Goodwill is measured at cost less any accumulated impairment losses.

Goodwill is not amortized but tested annually for impairment. This is done more often if events or changes in circumstances indicate that the carrying amount may be impaired. The impairment loss to be recognized is determined based on an assessment of the net realizable value of the cash generating unit to which the goodwill has been allocated. If the net realizable value of the cash generating unit is lower than it's carrying amount, an impairment loss is recognized.

(3.2) Other non-current intangible assets

Non-current intangible assets include, among other things, the direct costs of designing, building, testing, setting up, and customizing an enterprise resource planning (ERP) system for internal use and for use by other corporate units. These direct costs are amortized over the expected useful life of 3 years.

(3.3) Property, plant and equipment

Property, plant and equipment is initially recognized at cost. Property, plant and equipment is depreciated using the straight-line method over the estimated useful lives of the assets; a residual value of zero is assumed (except for land). Depreciation of investments made in the current period commences on the date the asset is used for the first time.

Machinery and installations are depreciated applying the component approach, under which the depreciation period is differentiated according to the nature of the asset. Land is not depreciated.

The annual straight-line depreciation charges, expressed as a percentage of cost, are as follows:

K%Land and buildings0 to 2.5Machinery and installations10 to 25Office equipment and Non-current operating assets20 to 33

In the case of major investment projects, financing costs incurred during construction are recognized as part of the cost of the item of property, plant and equipment concerned.

Capitalized leased assets are depreciated over the shorter of estimated useful life or lease term of the asset, if there is no reasonable assurance that Siemens will take ownership at the end of the lease term.

Assets held for sale are measured at the lower of their carrying amounts or fair value less costs to sell.

(3.4) Impairment of other non-current intangible assets and property, plant and equipment

The carrying amounts of other non-current intangible assets and property, plant and equipment are tested for impairment if there have been changes or circumstances that suggest that the carrying amount of the asset may not be recovered. The recoverability of assets in use is determined by comparing their carrying amounts with the present value of the future net cash flows the assets are expected to generate. If the carrying amount of an asset is higher than the estimated future cash flows or the direct realizable value less costs to sell, an additional write-down is recognized and charged to the income statement for the difference between the carrying amount and the net realizable value of the asset. Assets available for sale are measured at the lower of carrying amount or market value less costs to sell.

(3.5) Financial instruments

Non-current financial assets

Receivables arising from financial leases are measured at the present value of the lease installments still to be received. Other non-current receivables as well as receivables arising from the equity investments are measured at amortized cost less any allowances deemed necessary for receivables that may be uncollectable.

Financial assets are classified according to IFRS 9, at initial recognition, as measured at amortized cost. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them.

In order for a financial asset to be classified and measured at amortized costs, the assessment is performed at an instrument level. The contractual terms of the financial asset give rise on specified dates to the Company's cash flows that are solely payment of the principal amount and interest of the principal amount outstanding.

The Company's business model for managing financial assets refers to how it manages its financial asset in order to generate cash flows. The Company held the financial asset in order to collect contractual cash flows.

Financial assets are subject to impairment. Gains and losses are recognized in profit and loss when the asset is derecognized, modified or impaired.

The Company's financial assets at amortized cost includes receivables from affiliate companies.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, i.e. the date that the Company commits to purchase or sell the asset.

Receivables

Receivables are initially recognized at fair value (including transaction costs) and subsequently at amortized cost less any allowances deemed necessary for receivables that may be uncollectable. Receivables include liquid assets that are placed in interest-bearing investments within the Siemens Group as part of cash pooling.

Prepayments

Prepayments are initially recognized at fair value (including transaction costs) and subsequently at amortized cost less any allowances deemed necessary for receivables that may be uncollectable.

Non-current liabilities

Non-current liabilities are initially recognized at fair value (including transaction costs) and subsequently measured at amortized cost. Share premiums, discounts, redemption premiums, and transaction costs are allocated to the respective periods as interest expenses using the effective interest method.

Other assets and liabilities

Other assets and liabilities (if they are financial instruments) are initially recognized at fair value (including transaction costs) and subsequently measured at amortized cost, with the carrying amount of other assets adjusted where necessary.

Non-derivative financial instruments

Non-derivative financial instruments include trade receivables, non-current receivables and other receivables, cash and cash equivalents, borrowings and other financing liabilities, trade payables, and other items payable. Cash and cash equivalents include cash and bank balances as well as other directly callable deposits. Non-derivative financial instruments are initially recognized at fair value (including transaction costs) and subsequently measured at amortized cost using the effective interest method, reduced by impairment losses.

Derivative financial instruments and hedging activities

Siemens Nederland N.V. uses derivative financial instruments, such as forward currency contracts are used, to hedge foreign currency risks. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss. The Company applies hedge accounting, using the cash flow hedging method. When entering into a cash flow hedge, the hedging relationship is designated and documented, as are the purpose and financial risk management strategy pursued in entering into the hedging transaction. The documentation provides information about the hedging instrument, the hedged item or transaction, the type of risk to be hedged, and how the Company will assess the effectiveness of the hedging instrument in offsetting the risk of changes in the fair value of the hedged item or in the cash flows attributed to the hedged risk. These types of hedges are expected to be highly effective in offsetting the changes in fair value or cash flows attributable to the hedged risk; they are continually assessed to determine whether the hedge was substantially highly effective during the reporting periods for which the hedge was intended. Under cash flow hedging any change in fair value of the effective portion of the hedged item is recognized as an asset or liability and the corresponding gain or loss is recognized in other comprehensive income.

(3.6) Inventories

Inventories of merchandise and semi-finished goods are measured at the lower of average cost or market value. Allowances necessary as a result of obsolescence are recognized.

(3.7) Contract assets and liabilities

When either party to contracts with customers has performed, the company presents a contract asset, a contract liability or a receivable depending on the relationship between Siemens' performance and the customer's payment. Contract assets and liabilities are presented net as current since incurred in the operating cycle. Receivables are recognized when the right to consideration becomes unconditional. Valuation allowances for credit risks are setup for contract assets and receivables according to the accounting policy for loans and receivables.

(3.8) Cash and cash equivalents

Cash and cash equivalents are measured at nominal values. Cash and cash equivalents include all credit balances with banks, excluding affiliated companies, and short-term, highly liquid investments with an original maturity of three months or less, which can be directly converted into cash and cash equivalents.

(3.9) Provisions

General

Provisions are recognized, if:

- (a) there is a legal or constructive obligation because of a past event;
- (b) it is probable that an outflow of resources will be required to settle the obligation; and
- (c) the amount of the obligation can be reliably estimated.

If the Company expects to receive compensation for the provision in full or in part, for example because of an insurance policy, the compensation is recognized as a separate asset, providing it is virtually certain that the compensation will be received. The expense incurred in connection with the provision is recognized in the income statement, less any compensation. If the effect of the time value of money is material, the provisions are discounted to present value by applying a discount rate before tax, which, where applicable, considers the specific risks associated with the obligation. If the provision is discounted, the increase in the provision with the passage of time is charged to financing costs.

Warranty provisions

Warranty provisions relate to warranties issued on products, systems, and projects sold. They are measured at the present value of the expected settlement costs. These settlement costs are estimated based on costs the Company has incurred in the past for the sale of comparable products and/or based on technical assessments. The majority of warranty obligations have duration of one to two years.

Onerous contracts

A provision for onerous contracts is recognized in the statement of financial position, if the benefits expected to be generated for the Company from a contract are lower than the unavoidable costs of meeting the obligations under the contract. The provision is measured at the present value of the costs expected to terminate the contract or, if lower, the present value of the net costs expected to continue to perform the contract. Before recognizing a provision, the Company recognizes any impairment write-downs on the assets related to the contract.

(3.10) Pensions

Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further contributions. Obligations in connection with contributions to defined contribution plans are recognized as personnel expenses in the income statement when the amounts fall due. Amounts paid in advance are recognized as assets, providing they can be repaid in cash or offset against future payments.

Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans. The net obligation of the Company arising from defined benefit plans is calculated separately for each plan by estimating the pension benefits the employees have accrued in exchange for their services in the reporting period and in prior periods. These pension benefits are discounted to determine present value. Any unrecognized past service costs and the fair value of plan assets are deducted. The discount rate reflects the yields at the reporting date on prime-rated corporate bonds with maturities that approximate those of the liabilities of the company. They are denominated in the same currency in which the benefits are expected to be paid. The calculation is made by an actuary annually using the projected unit credit method. Actuarial gains or losses are recognized directly in equity. As of 1 April 2011, only the executive management pension plan qualified as a defined benefit plan. See note 18 for further information.

If the calculation results in a positive balance for the company, the asset recognized is limited to an amount that is no higher than the present value of economic benefits in the form of any future refunds from the plan or reductions in future contributions to the plan. An economic benefit is available to Siemens Nederland N.V. if it can be realized during the term of the plan or on settlement of the obligations of the plan.

(3.11) Leases

As a lessee

All leases where Siemens Nederland N.V. is the lessee (with the exception of short-term and low-value leases) are recognized in the statement of financial position. A lease liability is recognized based on the present value of the future lease payments, and a corresponding right-of-use asset is recognized. The right-of-use asset is depreciated over the shorter of the lease term or the useful life of the asset. Lease payments are apportioned between finance charges and a reduction of the lease liability. Low-value items and short-term leases with a term of 12 months or less are not required to be recognized on the balance sheet and payments made in relation to these leases are recognized on a straight-line basis in the income statement.

For leases that were classified as finance leases under IAS 17, the carrying amount of the right-of-use asset and the lease liability at 1 October 2019 are determined at the carrying amount of the lease asset and lease liability under IAS 17 immediately before that date.

As a lessor

Siemens Nederland N.V, is an intermediate lessor for most of its property leases. In these cases, it accounts for its interest in the head lease and the sub lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset.

To classify each (sub-)lease, the company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards of the head lease. Is this the case, then the sub-lease is classified as a finance lease. If not, then it is an operating lease.

(3.12) Foreign currency translation

Monetary assets and liabilities denominated in foreign currency are measured at the rate as of the reporting date. Income and expenses denominated in foreign currency are translated at the transaction rates in the respective accounting period. Differences arising on translation of monetary items are recognized in profit or loss. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item.

(3.13) Revenue

Revenue recognition — Siemens recognizes revenue, when or as control over distinct goods or services is transferred to the customer; i.e. when the customer is able to direct the use of the transferred goods or services and obtains substantially all of the remaining benefits, provided a contract with enforceable rights and obligations exists and amongst others collectability of consideration is probable taking into account our customer's creditworthiness. Revenue is the transaction price Siemens expects to be entitled to. Variable consideration is included in the transaction price if it is highly probable that a significant reversal of revenue will not occur once associated uncertainties are resolved. The amount of variable consideration is calculated by either using the expected value or the most likely amount depending on which is expected to better predict the amount of variable consideration. Consideration is adjusted for the time value of money if the period between the transfer of goods or services and the receipt of payment exceeds twelve months and there is a significant financing benefit either to the customer or Siemens. If a contract contains more than one distinct good or service, the transaction price is allocated to each performance obligation based on relative stand-alone selling prices. If stand-alone selling prices are not observable, the Company reasonably estimates those. Revenue is recognized for each performance obligation either at a point in time or over time.

Sales from construction-type contracts: Revenues are recognized over time under the percentage-of-completion method, based on the percentage of costs incurred to date compared to total estimated costs. An expected loss on the contract is recognized as an expense immediately. Payment terms are usually 30 days from the date of invoice issued according to the contractual terms. The percentage-of-completion method places considerable importance on accurate estimates of the extent of progress towards completion and may involve estimates on the scope of deliveries and services required for fulfilling the contractually defined obligations. These significant estimates include total estimated costs, total estimated revenues, contract risks, including technical, political and regulatory risks, and other judgments. Under the percentage-of-completion method, changes in estimates may lead to an increase or decrease of revenue. In addition, Siemens needs to assess whether the contract is expected to continue or to be terminated. In determining whether the continuation or termination of a contract is expected to be the most likely scenario, all relevant facts and circumstances relating to the contract are considered on an individual basis.

Revenues from services: Revenues are recognized over time on a straight-line basis or, if the performance pattern is other than straight-line, as services are provided, i. e. under the percentage-of-completion method as described above. Payment terms are usually 30 days from the date of invoice issued according to the contractual terms.

Sale of goods: Revenues are recognized at a point in time when control of the goods passes to the buyer, usually upon delivery of the goods. Invoices are issued at that point in time and are usually payable within 30 days.

(3.14) Interest income

Income is recognized as the interest accrues (using the effective interest method, i.e. the interest rate that discounts the

estimated future cash inflows during the expected useful life of the financial asset to the net carrying amount of the financial asset).

(3.15) Income taxes

Current taxes

Current taxes receivable and payable for current and prior years are measured at the amount that is expected to be paid or recovered within the tax group. The tax amount is calculated based on the substantively enacted tax rates and tax laws.

Deferred taxes

For deferred tax liabilities, provisions are recognized based on the temporary differences as of the reporting date between the tax bases of assets and liabilities and the carrying amounts recognized in these financial statements. Deferred tax assets are recognized for all recoverable temporary differences, unused tax credits, and unused tax loss carry forwards, to the extent that it is probable that taxable profit will be available to offset the recoverable temporary differences, and the recoverable temporary differences, unused tax credits, and unused tax loss carry forwards can be utilized.

The carrying amount of deferred tax assets is assessed as of the reporting date and reduced to the extent that it is not probable that sufficient tax profit will be available against which the temporary difference can be fully or partially utilized. Unrecognized deferred tax assets are reassessed as of the reporting date and recognized to the extent that it is probable that sufficient tax profit will be available in the future against which this deferred tax asset can be utilized Deferred tax assets and liabilities are measured using the tax rates expected to be applicable to the period in which the asset is recovered or the liability settled, on the basis of the enacted tax rates and tax laws.

Taxes on items directly recognized in equity are likewise recognized in equity instead of the income statement.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to settle tax assets and liabilities on a net basis and the deferred tax amounts are levied by the same taxing authority on the same taxable entity.

Tax group

Siemens Nederland N.V. and other group companies form a tax group with its parent company in the Netherlands for the levying of corporation tax. The Group forms a tax group with its parent company for value added tax.

(3.16) Company statement of cash flows

The company statement of cash flows has been compiled using the indirect method. Bank overdrafts that can be drawn directly and form an integral part of the companies' liquidity management are included under cash and cash equivalents in the statement of cash flows. Any surplus of cash and cash equivalents is invested with financial institutions of the Siemens Group. If there is any shortfall of cash and cash equivalents, it is borrowed from the same financial institutions. For this reason, changes in financing receivables from and liabilities to affiliated companies are reported in the statement of cash flows not as changes in working capital, but on a net basis as cash flows from financing activities.

(3.17) Subsidies

Subsidies reduce the costs in the line item to which the costs of the subsidized activities were charged. Subsidies are recognized as soon as there is reasonable assurance that the subsidy will be paid. Main subsidies are from the "WBSO". Under this Act, a contribution is paid towards the wage costs of employees directly involved in R&D. The contribution is in the form of the payroll tax reduction and social security contributions. Subsidies are only recognized in profit & loss when the

related costs are incurred.

(3.18) Share-based payment

The Company participates in equity-settled share-based payment plans established by its ultimate parent company Siemens AG.

The Company pays Siemens AG a consideration for the awards and bonus shares provided and will account for the transaction as a cash-settled share-based payment. In accordance with IFRS2, the cost of these cash-settled transactions is measured initially at fair value at the grant date. This fair value is expensed over the period until the vesting date with recognition of a corresponding liability. The liability is re-measured to fair value at each reporting date up to, and including the settlement date, with changes in fair value recognized as expense. The fair value in each fiscal year is calculated by applying a valuation model. Inputs to that model include an expected weighted volatility of Siemens shares and a market price per Siemens share. Expected volatility was determined by reference to historic volatilities.

(4) Fair value measurement

A number of policies and the Group's information provision requirements necessitate the determination of the fair values of both financial and non-financial assets and liabilities. For measurement and information purposes, fair value has been determined using the following methods. Where applicable, further information about the bases for determining fair value is provided in the section of this note applicable specifically to the asset or liability concerned.

Goodwill

The fair value of goodwill acquired as a result of a business combination is determined on the basis of the discounted estimated future cash flows.

(5) Financial risks & capital management

This section of the notes provides information on the exposure of the company to each of the risks itemized in the paragraphs below, the purposes, policies, and procedures the company pursues to manage and measure those risks, as well as on the capital management of the company. In addition, these company financial statements include further quantitative disclosures.

(5.1) Financial risks

The use of financial instruments by the company means that they are exposed to the following risks:

- · Credit risk;
- Market risk.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables and contract assets) and from its financing activities. Regarding trade receivable credit risk, the Company uses a risk management system of which credit risk monitoring and control is a significant element. A credit check is performed on all customers requesting credit in excess of a specified amount. Credit ratings are determined based on internal and external sources, such as Dun & Bradstreet. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several industries and operate in largely independent markets.

Siemens recognizes allowances for bad debt and doubtful accounts for the estimated credit risk, based on a combination of the individual customer's credit rating and specific risks. Specific risks include, for example, a moratorium on payments, the instigation of collection procedures, and payment arrangements made. An impairment analysis is performed at each reporting date using a new impairment model to measure expected credit losses (ECL). ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Company applies a simplified approach in calculating ECLs. Therefore, the Company recognizes a loss allowance based on lifetime ECLs at each reporting date. The Company use the Group's new impairment model that is based on the credit rating, adjusted for forward-looking factors specific to the debtors. Letters of credit are considered integral part of trade receivables and considered in the calculation of impairment. The credit risk exposure on the Company's contract assets and trade receivables are respectively disclosed in note 9 and 11.

Market risk

Market risk is the risk that the he company's revenue or the value of investments in financial instruments are adversely affected by changes in market prices, such as exchange rates, interest rates, and share prices. Market risk management is aimed at keeping the market risk exposure within acceptable limits while optimizing returns. For managing market risk, the Company enters into derivative financial instruments. These types of transactions are carried out in accordance with the guidelines specified by the risk management committee. In general, the company uses hedge accounting to manage volatility in the income statement.

Interest rate risks

On average in 2022, the Company held EUR 151.6 million (2021: EUR 145.5 million) in short-term deposits or on current account with the treasury department of Siemens AG. Following market conditions, interest on these amounts is fixed for a maximum of three months at arm's length market rates. A change in the interest rate on the deposits of 10 basis points would lead to a change in interest expense of EUR 0.2 million (2021: EUR 0.1 million) for the Company.

Foreign currency risks

The Company is exposed to foreign currency risks because of sales and purchases in currencies other than the functional currency. The risk on virtually all sales and purchases denominated in foreign currency is hedged in full through forward exchange contracts at the treasury department of Siemens AG. This approach has proved successful in the past in managing these risks. The Company is responsible for its own administration, assessment, monitoring, and hedging of the currency risks on sales and purchases. The FX derivative financial instruments at the end of the reporting period are not material. Please refer to note 20.

(5.2) Liquidity risk

The Company manages its liquidity risk by managing the working capital and the deposits at its disposal, which are invested within the Siemens Group, as well as cash and cash equivalents. In addition, the company manages its liquidity risk by making use of the borrowing and deposit facilities within the Siemens Group.

(5.3) Capital management

The Company's capital consists of issued and paid in share capital, share premium reserves and retained earnings as stated as Equity in the Statement of Financial position and the Statement of changes in Equity. The main purpose of capital

management at the company is to maintain a good credit rating and a healthy solvency ratio to support its activities and maximize shareholder value. The Company is not subject to externally imposed capital requirements. The Company did not change its objectives, policies and processes for capital management during the fiscal year.

Notes to the company statement of financial position

(6) Non-current intangible assets

	Software and development costs	Goodwill	Total
Carrying amount as of 30 September 2020			
Cost	35.1	1.8	36.9
Amortization	-35.1	_	-35.1
		1.8	1.8
Changes			
-		-	-
		_	
Carrying amount as of 30 September 2021			
Cost	35.1	1.8	36.9
Amortization	-35.1	-	-35.1
		1.8	1.8
Changes			
-			-
		-	
Carrying amount as of 30 September 2022			
Cost	35.1	1.8	36.9
Amortization	-35.1	-	-35.1
		1.8	1.8

Software includes internally developed software. This software operates on the ERP system for the Company's own use and for use by other corporate units.

Once a year, an impairment test is performed to establish whether the value of Goodwill is not overstated. The discounted value of expected future cash flows is then compared with the net carrying amount of the asset. The test is performed at Business level, which is the level to which income and expenses can be allocated independently. Amounts are discounted using an Business-specific cost of capital after tax. No (fixed) growth rate is assumed, because this would provide skewed figures for the Operating Companies that primarily deal in projects.

Business	Goodwill	WACC
Digital Industries	1.5	9.0
Smart Infrastructure	0.3	7.5
	1.8	

The discounted cash flows exceeded the net carrying amounts in all cases, which means that the amount in the Business' statement of financial position is not overstated. As in previous years, there is no indication that goodwill must be impaired in the fiscal year under review. Reasonably possible changes in a key assumption would not cause the carrying amount to exceed its recoverable amount and consequently no sensitivity analysis is disclosed. The goodwill recognized in the statement of financial position of the Company consists of goodwill that arose from the acquisition of several smaller acquisitions which have been integrated into Siemens Nederland N.V. There is no accumulated impairment on Goodwill.

(7) Property, plant and equipment

	Land and buildings	Machinery and installations	Office equipment	Non-current operating asset in process	Total
Carrying amount as of					
30 September 2020					
Cost	6.0	9.9	5.9	0.0	21.9

	2.2	0.1	1.2	0.5	4.0

The carrying amount of installations supplied under operating leases amounted to EUR 0.0 million as of 30 September 2022 (2021: EUR 0.0 million). No investments were made in these assets during the year (2021: EUR 0.0 million).

The cost of property, plant and equipment still in use at 30 September 2022 was EUR 13.8 million (2021: EUR 14.8 million), which had been depreciated in full. There were no contractual obligations to acquire property, plant and equipment as of 30 September 2022 (2021: EUR 0.0 million).

(8) Leases and Non-current financial assets

The leases of the Company can be split into two categories: Real estate property and Other leases, such as cars and office equipment.

The company subleases parts of its real estate property to other legal entities, mainly other Siemens group companies. IFRS16 specifies conditions whereby a sublease is to be classified as a finance lease. In these cases, the respective Right of use asset is derecognized and a finance lease receivable recognized instead, representing the net investment in the (sub-) lease. All finance lease receivables of the Company result from real estate property sub-leases. They have been classified as finance leases because they are for the whole of the remaining term of the respective head leases.

Right of use assets	Real estate property	Other leases	Total
Carrying amount as of 30 September 2020	15.8	7.2	23.0
Additions		3.5	3.5
Remeasurement	0.2	0.9	1.1

Depreciation	-3.3	-3.5	-6.8
End balance 30 September 2022	9.3	6.1	15.4
Lease liabilities	_	2022	2021
Current Real estate Property		7.8	10.6
Other leases		2.6	3.0
Non-current		2.0	0.0
Real estate Property		15.2	30.8
Other leases		3.5	4.1
Total		29.1	48.5
Amounts recognized in the income statement	_	2022	2021
Rental income from subleasing right-of-use assets		1.0	1.0
Interest income from subleasing right-of-use assets		0.0	0.1
Expenses relating to short-term leases		0.3	0.3
Interest expense on lease liabilities		-0.1	-0.1

In addition to the rental income from subleasing or right-of-use assets no rental income from short term leases was reported (2021: EUR 0.0 million).

Finance lease receivables

	2022	2021
Short-term	4.1	6.7
Long-term	10.1	22.1
	14.2	28.8

The following table sets out the maturity analysis of lease receivables, showing the undiscounted lease amounts to be received after the balance sheet date.

	2022	2021
Within one year	4.2	6.9
One to two years	4.1	6.1
Two to three years	3.9	6.0
Three to four years	0.7	5.8
Four to five years	0.5	2.8
To be settled after fifth subsequent year	0.9	1.4
Total undiscounted lease payments receivable	14.3	29.0
Unearned finance income	-0.1	-0.2
Net investment in the lease	14.2	28.8

The following table sets out the maturity analysis of lease liabilities, showing the undiscounted lease amounts to be paid after the balance sheet date.

2022	2021
10.5	13.7
9.6	12.1
6.6	11.1
1.2	8.2
0.5	2.2
0.8	1.3
29.2	48.6
-0.1	-0.1
29.1	48.5
	10.5 9.6 6.6 1.2 0.5 0.8 29.2 -0.1

Non-current financial assets

	2022	2021
Finance lease receivables	10.1	22.1
Other receivables	0.0	0.1
	10.1	22.2

(9) Contract assets and contract liabilities

Contract assets	2022	2021
Contract assets	31.6	31.7
Provision on contract assets	0.0	0.0
Total contract assets	31.6	31.7
Current	21.8	20.9
Non-current	9.8	10.8
Contract liabilities		
Refund liabilities		
- Price and quantity discounts	5.8	5.1
Advance payments from 3rd parties	6.7	10.6
Billings in excess of costs	17.0	11.3
Total contract liabilities	29.5	27.0
Current	24.0	23.2
Non-current	5.5	3.8

Contract assets and contract liabilities from continued operations did not significantly change.

(10) Inventories

As of 30 September 2022, a provision of EUR 3.5 million had been recognized for obsolescent inventories (2021: EUR 3.7 million).

(11) Trade and other receivables

	2022	2021
Trade receivables	63.8	48.5
Receivables from Affiliated Companies	167.5	161.0
Other receivables	0.3	0.6
	231.6	210.1

Most of the receivables from companies that are part of the Siemens Group relate to receivables on funds temporarily placed in interest-bearing deposits or current account within the Group. For more information, please refer to note 20 on financial instruments.

The changes in allowances for uncollectible trade receivables were as follows:

	2022	2021
At 1 October	0.1	0.2
Realized losses	-0.0	-0.0
Additions (withdraws)	0.0	-0.1
At 30 September	0.1	0.1

The credit and currency risks associated with trade and other receivables (excluding projects in process on the instructions of third parties) are explained in note 20.

Ageing analyses of receivables

	Total receivables	Not overdue	<31	31-60	61-90	>91
2022	63.8	57.2	3.5	2.4	0.3	0.4
2021	48.5	43.1	4.0	0.8	0.5	0.1

Allowance

As at	2	022	2021	
	Receivables	Allowance	Receivables	Allowance
With allowance	63.8	0.1	48.6	0.1
Without allowance	0.1		0.0	

For the receivables without allowance a letter of credit was received which mitigates the credit risk of these receivables.

(12) Other financial assets

	2022	2021
Finance lease receivables	4.1	6.7
Other	3.9	4.7
	8.0	11.4

For information on finance lease receivables, please refer to note 8.

Other financial assets mainly consists of a pension receivable (note 18) and derivatives.

(13) Prepayments

Prepayments are mainly related to non-progress relevant costs of projects and advance payments for performance obligations satisfied at a point in time.

(14) Cash and cash equivalents

The Company invests its cash in interest-bearing accounts with financial institutions within the Siemens AG Group. These amounts are reported under "Receivables from Affiliated Companies" (see note 11). External bank accounts are only used for cash received or cash intended for use in the very short-term. The aim is to keep the outstanding amount of cash to a minimum. The Company does not keep any cash on hand. At balance sheet date all amounts in cash at bank are at its free disposal.

	2022	2021
Bank accounts (current accounts)	0.2	0.1
	0.2	0.1

(15) Assets held for sale and discontinued operations

Portfolio Company Large Drive Applications

In October 2021 Siemens announced that it would separate its Portfolio Company Large Drive Applications to a stand-alone company and this was realized in July 2022. For our P&L statement in 2021 and 2022 and Balance sheet at September 2021, the sale had a low impact (Net income EUR 0.1 million (2021: EUR 0.1 million), Assets EUR 0.2 million and Liabilities EUR 0.7 million) and is not considered as a significant activity according to IFRS 5. Consequently these figures are not represented separately as discontinued operations.

Portfolio Company Commercial Vehicles

In May 2022 Siemens has announced to sell its Commercial Vehicles business, which is part of the Siemens' Portfolio Companies. The transaction is expected to close in the first quarter of fiscal year 2023. For our P&L statement and Balance sheet, the sale will have a low impact (Net income EUR 0.5 million, Assets EUR 2.2 million and Liabilities EUR 0.8 million) and is not considered as a significant activity according to IFRS 5. Consequently these figures are not represented separately as discontinued operations.

(16) Equity

	Issued capital	Share premium	Retained earnings	Profit for the year	Total

Pensions

PME

The Company participates in the Pension Fund for the Mechanical and Electrical Engineering Industry (PME), except for the pension plan for senior management. The PME-pension scheme is a defined benefit agreement referred to as a conditional average earnings scheme. The company accounts for the defined benefit agreement as a defined contribution plan, because there is no reliable basis for allocating the obligations, plan assets, and costs to the participating companies, since PME does not (or cannot) provide the information. In accordance with the PME plan, Siemens only has an obligation to pay the contributions due annually. Since there is no reliable basis for allocating the obligations, plan assets, and costs to the participating companies in PME, there is very likely no obligation to make up any shortfalls in the plan. If the coverage of PME assets versus liabilities is not enough, the deficit would likely be reflected as decrease of vested rights and/or increase of pension premium. The industry fund has a coverage ratio of 115.0% as at 30 September 2022 (2021: 104.6%).

Early retirement plan

At the end of the reporting period no employees are eligible for the early retirement plan for employees born before 1950 anymore and the plan has therefore been discontinued.

Senior management plan

The pension plan for senior management was a final salary scheme and has been discontinued as of 1 January 2015. All vested rights have been frozen as of this date. Indexation is decided annually but is limited to the indexation granted in the Pension Fund for the Mechanical and Electrical Engineering Industry (PME) and conditional depending on plan assets. The administration of the pension plan for senior management has been assigned to an insurer in accordance with section 2 (4) (B) of the Dutch Pensions and Savings Funds Act. No contributions are due after discontinuation of the pension plan.

The numbers of pension plan members are as follows:

Number of members				2022	2021
Beneficiaries				9	8
Vested deferred members				0	1

Actuarial assumptions for calculating the discounted obligations and net periodic cost:

Assumptions of variables	2022	2021
Actuarial discount rate	3.67%	0.86%
Salary increase rates	0.00%	0.00%
Indexation	1.15%	0.50%
Mortality table	Generation tables*	Generation tables*

The discount rate applied in the calculation reflects the return as of the reporting date on prime-rated bonds with maturities that approximate those of the Group's liabilities and are denominated in the same currency in which the benefits are expected to be paid.

Contributions to the industry pension fund

Change in net accumulated equity component

The employer contributions to the industry pension fund amounted to EUR 9.4 million (2021: EUR 8.4 million).

Warranty provisions

Provisions are recognized for expected warranty claims on systems and installations sold in the past one to two years, based on past experience with the volume of repairs and returns. Most of these costs are expected to be incurred in the following fiscal year and all of them within two years of the reporting date. The assumptions made in calculating the warranty provisions are based on current sales levels and information available on returns, on the basis of the standard warranty period of one to two years on all products sold.

Order-related provisions

Order-related provisions are anticipated onerous contracts (contracts in which the expected costs are estimated to be higher than the expected benefits) and outstanding (project) costs still to be received.

^{*} Assumptions about future mortality rates are based on the AG projections table 2022, published by the Dutch Association of Actuaries (AG).

Personnel-related provisions

Personnel-related provisions are mainly severance payments and long-term service awards.

Other provisions

Other provisions comprise all provisions, which are not included in the provisions mentioned above. These include amongst other record retention, under-utilization of real estate and other assets leased under an operating lease and specific other minor provisions.

(19) Trade and other payables

	2022	2021
Trade payables	39.3	32.8
Liabilities to Affiliated Companies	1.9	1.2
Taxes and social security contributions payable	33.0	25.7
Other liabilities	15.0	15.8
Pension contributions payable	4.5	3.4
	93.7	78.9

The taxes and social security contributions payable have been offset against taxes and social security contributions receivable, provided that they are payable to or receivable from the same party and a legal right to offset exists.

(20) Financial instruments

The table below shows the carrying amounts of all financial instruments recognized in the financial statements.

	2022	2021
Financial assets		
Non-current financial assets:		
Non-current receivables:		
Other receivables	10.1	22.2
Current receivables:		
Trade and other receivables:		
Receivables from Affiliated Companies	167.5	161.0
Other trade receivables and other receivables	64.1	49.1
Other financial receivables:		
Lease receivables	4.1	6.7
Other financial receivables	3.9	4.7
Financial liabilities		
Non-current liabilities:		
Other financial liabilities:		
Lease liabilities	-18.7	-34.9
Current liabilities:		
Trade and other payables	-93.7	-78.9
Lease liabilities	-10.4	-13.6
Tax liabilities	-8.3	-0.5

The fair values of cash and cash equivalents, (current) receivables, and current liabilities correspond to their carrying amounts. This is due to the high level of liquidity and/or short maturities of the instruments.

Liquidity risk

The table below shows the contractual terms and repayment obligations of the financial assets and financial liabilities, including estimated interest payments:

The interest is fixed until the end of the term of the intragroup deposits.

Interest rate risk

For an assessment of the risk in the subsequent year, please refer to note 5.

Credit risk

With regard to the trade receivables and lease receivables items, the Company has processes and control mechanisms in place to keep the risks to a minimum. The Company's maximum risk exposure is theoretically equal to the total balance outstanding. The Company regards its policies to manage this risk (see also note 5) as effective, since realized losses (see note 11) have been low in recent years.

Currency risk

An exchange rate loss of EUR 0.9 million was generated (2021: profit of EUR 0.9 million).

Hedging activities

As of 30 September 2021, and 30 September 2022, the Company had entered into various forward exchange contracts to hedge currency risks on expected future sales to customers and future deliveries from suppliers. Most of the contracts expire within one year. Cash flow hedge accounting is used, if all strict conditions are met.

The fair values recognized for these forward exchange contracts as of 30 September were as follows:

	2022	2021
Derivatives not designated as hedging instruments		
Foreign exchange forward contracts	0.7	0.0
Embedded derivatives	0.0	0.0

(21) Contingent assets and liabilities

For certain projects, banks issue bank guarantees to third parties in which they stand surety for the Company meeting its obligations under the contracts. If a claim is made on a bank guarantee by third parties, the bank has the right of recourse to the Company. On 30 September, the following amounts of bank guarantees were outstanding:

	2022	2021
Bank guarantees	11.6	23.5

In addition to the guarantees provided by banks, as disclosed above, the ultimate parent company Siemens AG or its wholly owned subsidiaries also stand surety vis-à-vis third parties for the Company meeting its obligations under the contracts. In 2022, the ultimate parent company Siemens AG or its wholly owned subsidiaries provided surety in an amount of EUR 32.6 million (2021: EUR 42.9 million). The total guarantee amount for 2022 is therefore EUR 44.2 million (2021: EUR 66.4 million).

All companies belonging to either of these tax groups are jointly and severally liable for the taxes payable by the respective tax group. Siemens International Holding B.V. is the head of the tax group. The Company is the taxpayer. All companies in the Group periodically settle the account receivable or payable position with Siemens International Holding B.V. Since Siemens International Holding B.V. is the head of the tax group, all current and deferred tax assets and liabilities of the Company are positions vis-à-vis the parent company.

Notes to the company income statement

(22) Revenue

In accordance with section 2:380 of the Dutch Civil Code, the table below shows the distribution of revenue over geographical areas and operating segments.

Geographical areas	2022	2022	2021	2021
	Third parties	Related parties of Siemens AG	Third parties	Related parties of Siemens AG
The Netherlands	422.9	3.0	384.1	7.9
Europe other	39.2	23.1	34.6	47.3
Asia	34.5	3.1	25.3	1.2
Other continents	4.9	6.2	0.5	4.5
Total	501.5	35.4	444.5	60.9
Operating segments	2022	2022	2021	2021
	Third parties	Related parties of Siemens AG	Third parties	Related parties of Siemens AG
Smart Infrastructure	267.0	28.6	235.0	55.1
Digital Industries	218.8	4.4	188.7	2.8
Portfolio Companies	14.0	0.0	17.8	0.0
Real Estate	1.4	1.2	2.5	1.7
Other	0.3	1.2	0.5	1.3
Total	501.5	35.4	444.5	60.9

The amount of revenue recognized in the current period which was included in the contract liability at the end of the previous period was EUR 32.8 million (2021: EUR 33.3 million).

Order backlog

On 30 September 2022, order backlog was reported for EUR 454.9 million (2021: EUR 255.4 million) and this is expected to be recognized as revenue as follows:

Order backlog	Within 1 year		In the 1st	subsequent	After the 1st subsequent		
recognized as revenue:			ye	ear	y€	ear	
		Related		Related		Related	
	Third	parties of	Third	parties of	Third	parties of	Total
	parties	Siemens	parties	Siemens	parties	Siemens	TOLAI
		AG		AG		AG	
Smart Infrastructure	170.7	37.5	24.2	15.0	8.3	0.0	255.7
Digital Industries	162.9	8.4	23.2	2.2	-	-	196.7
Portfolio Companies	2.5	-	-	_	-	-	2.5
Total	336.1	45.9	47.4	17.2	8.3	0.0	454.9

(23) Finance income and expenses

Other interest and similar expenses include an amount of EUR -1.0 million (2021: EUR -1.1 million) from affiliated companies. For more information, please refer to note 25 on related parties.

(24) Tax on profit from continuing operations

The tax expense (income) recognized in the company income statement breaks down as follows:

	2022	2021
Income taxes for the current period from continued operations	10.6	9.7
Total current tax	10.6	9.7
Deferred taxes for the current period from continued operations	0.1	-0.1
Total deferred tax	0.1	-0.0
Total income tax for the current period	10.7	9.6

The reconciliation between the tax burden and the result of calculating the profit before tax, multiplied by the local tax rate, is as follows:

	2022	2021
Profit before tax		
(profit from continuing operations and profit from discontinued operations)	41.0	37.8
Tax at the locally applicable rate of 25.6% (2021: 25.0%)	10.7	9.5
True up related to prior years	0.0	0.0
Other	0.0	0.1
Tax burden	10.7	9.6

Siemens Nederland N.V. is part of a tax group headed by Siemens International Holding B.V. under which all parties are jointly and severally liable for the tax position.

(25) Related parties

Transactions with managing directors and key management personnel

Siemens Nederland N.V. has not issued loans to or entered into transactions with managing directors or managers.

Other related party transactions

The values of transactions involving goods and services with companies included in the scope of consolidation of Siemens AG were as follows:

Transaction values

			2022	2021
Purchases			324.0	292.5
Sales			35.4	60.9
	Intere	st	Balance outs	tanding
	2022	2021	2022	2021
Loans issued and interest income (expense*)				
Siemens Financial Services (current)	-0.9	-1.1	155.0	150.0
Cost of providing guarantees				
Siemens Financial Services	0.0	0.0	-	-
Cost of assuming credit risk				
Siemens Financial Services	0.0	0.0	-	-

The interest charged in the case of related parties is determined on an objective arm's length basis (EURIBOR plus a margin) and is settled within a maximum of six months of the end of the year. No collateral has been pledged for any balances.

The Company maintains a cash pool at the treasury department of Siemens AG, where balances are kept at market-related interest rates and from which loans are issued and/or raised.

^{*} Interest is due on loans issued

(26) Compensation of executive management and the Supervisory Board

Siemens Nederland N.V. pays salaries and emoluments to the members of the Management Board and of executive management and contributes to pension plans on their behalf.

As of 30 September 2022, 6 executive managers (2021: 6) were members of the Executive Management Team, which includes the Management Board. Their compensation breaks down as follows:

	2022	2021
Management Board (2 members (2021: 2 members))		
Short-term compensation	0.6	0.4
Pensions	0.1	0.1
Profit sharing and bonuses	0.2	0.1
Management Board total	0.9	0.6
Bonuses for the Management Board are subject to performance criteria. Executive Management Team excluding the Management Board (4 members (2021: 4	members))	
Short-term compensation	0.7	0.8
Pensions	0.1	0.1
Severance payments to former management members	-	0.4
Profit sharing and bonuses	0.2	0.2
Executive Management Team total	1.0	1.5
Total	1.9	2.1

The Supervisory Board had 4 members as of 30 September 2022 (2021: 4). They were paid compensation as follows:

	2022	2021
Compensation	0.1	0.1

(27) Rights to equity instruments

Stock awards

The expense recognized for employee services received during the year is shown in the following table:

	2022	2021
Expenses arising from cash-settled share-based payment transactions	0.4	0.2
Total expense arising from share-based payment transactions	0.4	0.2

For the Company the equity-settled shares are settled in cash to Siemens AG. The stocks awarded in equity are then fulfilled by Siemens AG.

In 2022, 6,072 (2021: 7,992) stock awards were granted to employees, of which 4,125 (2021: 5,631) to the Executive Management Team (including the Management Board).

	2022	2022	2021	2021

Granted provisionally	6,673		8,719	
Awarded	-3,695		-4,640	
Forfeited/Settled	-		-1,298	
At end of fiscal year	24,065	2.0	21,087	3.0

Fair value at the end of the fiscal year is calculated by multiplying the number of awards outstanding by the market value per share at the end of the fiscal year. The market value of the shares granted was EUR 100.88 as of 30 September 2022 compared with EUR 141.92 as of 30 September 2021.

Share Matching Plan

The expenses recognized for employee services received during the year is shown in the following table:

	2022	2021
Expenses arising from cash-settled share-based payment transactions	0.5	0.4
Total expenses arising from share-based payment transactions	0.5	0.4

For the Company the equity-settled shares are settled in cash to Siemens AG. The stocks awarded in equity are then fulfilled by Siemens AG.

In 2022, 1,786 (2021: 2,003) bonus shares were granted to employees, of which 113 (2021: 154) to the Executive Management Team (including the Management Board).

	2022	2022	2021	2021
	Awards in	Cumulative fair	Awards in	Cumulative fair
	absolute numbers	value	absolute numbers	value
At beginning of fiscal year	3,575	0.5	3,133	0.3
Granted	1,838		2,042	
Forfeited/settled	-234		-206	
Merger/Transferred	-1,461		-1,395	
At end of fiscal year	3,718	0.4	3,575	0.5

Fair value at the end of the fiscal year is calculated by multiplying the number of bonus shares by the market value per share at the end of the fiscal year. The market value of the bonus shares issued was EUR 100.88 as of 30 September 2022 compared with EUR 141.92 as of 30 September 2021.

(28) Employees

On average during the reporting period the number of employees, expressed as full-time equivalents, working for Siemens Nederland N.V. was as follows:

	2022	2021
Businesses	936	879
Management and staff departments	77	82
Total	1,013	961

(29) Depreciation, amortization, and impairment losses

	2022	2021
Property, plant and equipment	1.3	1.1
Right of use assets	6.8	7.2
Total	8.1	8.3

(30) Personnel costs

	2022	2021
Wages and salaries	85.8	80.6
Pension costs	9.4	8.4
Other social security costs	10.8	9.9
Total	106.0	98.9

(31) Audit fees

On the basis of Book 2 of the Dutch Civil Code, part 9 section 382a (3), Siemens Nederland N.V. opts not to disclose the costs of the auditors, because Siemens AG includes these costs in its IFRS financial statements in accordance with EU requirements.

Independent auditor's report

To: the general shareholders' meeting, audit committee and the supervisory board of Siemens Nederland N.V.

Report on the audit of the financial statements for the year ended 30 September 2022 included in the annual report

Our opinion

We have audited the accompanying financial statements for the year ended 30 September 2022 of Siemens Nederland N.V., based in The Hague.

In our opinion the accompanying financial statements give a true and fair view of the financial position of Siemens Nederland N.V. for the year ended 30 September 2022, and of its result and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union (EU-IFRS) and with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

- The company statement of financial position for the year ended 30 September 2022
- The following statements for the year ended: the company income statement, the company statements of comprehensive income, changes in equity and cash flows
- The notes comprising a summary of the significant accounting policies and other explanatory information

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the "Our responsibilities for the audit of the financial statements" section of our report.

We are independent of Siemens Nederland N.V. in accordance with the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Report on other legal and regulatory requirements

In addition to the financial statements and our auditor's report thereon, the annual report contains other information that consists of:

- · Report of the management board
- Other information pursuant to Part 9 of Book 2 of the Dutch Civil Code

Based on the following procedures performed, we conclude that the other information:

- · Is consistent with the financial statements and does not contain material misstatements
- · Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements.

By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is less than the scope of those performed in our audit of the financial statements.

Management is responsible for the preparation of the other information, including the management board's report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information pursuant to Part 9 of Book 2 of the Dutch Civil Code.

Description of responsibilities for the financial statements

Responsibilities of management and the supervisory board for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with EU-IFRS and Part 9 of Book 2 of the Dutch Civil Code. Furthermore, management is responsible for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, management is responsible for assessing the company's ability to continue as a going concern. Based on the financial reporting frameworks mentioned, management should prepare the financial statements using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so. Management should disclose events and circumstances that may cast significant doubt on the company's ability to continue as a going concern in the financial statements.

The supervisory board is responsible for overseeing the company's financial reporting process.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit assignment in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not have detected all material errors and fraud.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included among others:

- lentifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or
 error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that
 is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control
- Obtaining an understanding of internal control relevant to the audit in order to design
 audit procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the company's internal control
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management
- Concluding on the appropriateness of management's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern.
 If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures
- Evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

We communicate with the supervisory board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.
