

Complant Ltd. Ethiopia Omo-Kuraz 2 sugar plant & Omo-Kuraz 3 sugar plant project

The exterior of the Omo-Kuraz sugar plant

Siemens supported China National Complete Plant Import & Export Corporation Limited (Complant Ltd.) to help Ethiopian Sugar Corporation build Omo-Kuraz 2 sugar factory (OMO 2) and Omo-Kuraz 3 sugar factory. In the project, Siemens supplied both factories with the Totally Integrated Automation (TIA) solutions including the PCS 7 control system and low-voltage converters covering the whole plant. Siemens' solutions helped the sugar factories achieve a high level of automation and improve the production efficiency.

In the project, Siemens' global service system responded to customer demands quickly. For example, during the construction of OMO 2 sugar factory, Siemens dispatched engineers in South Africa to conduct the equipment maintenance on site. This supported the efficient implementation of the project.

Ethiopia has a high yield of sugarcane. Once coming into operation, the two sugar factories can help drive the development of local economy by making good use of the abundant sugarcane resources.
