

SEI Malaysia RAPID Project

Siemens' hydrogen make up compressors at the site of the PAPID project

Siemens worked with SINOPEC Engineering Incorporation (SEI) to provide key equipments, including hydrogen make up compressors and hydrogen recycle compressors, to Malaysia Refinery and Petrochemical Integrated Development (RAPID) project of PetroliaM Nasional Berhad (PETRONAS). With the state-of-the-art technology of compressor engineering and manufacturing, the best practices of installation and operation of compressors in large oil refineries, and long-term and trusted working experiences with SEI, Siemens was selected to supply critical compressors in the RAPID project. In the future, by integrating and leveraging the company's advantages of manufacturing and services in the global oil and gas business, Siemens will keep improving itself to support Chinese companies to go global.
