

Siemens charging technology for multiple applications

Fleets with depot & opportunity charging

 Charge management optimized for driving operation

Highway transit charging

 80 percent battery level in less than 15 minutes ("Charging like refueling")

Urban gas station networks/Truck stops

 DC fast-charging stations up to 350 kW

 Central energy management and integration of PV and storage technology

 Compact charging system

Parking garages

 Connection to existing charging management and customer management systems

 Integration into energy and building management solution

Enterprises & retailers

 Connection to existing charging management and customer management systems
