BACnet and EtherNet/IP wireless gateway for Siemens clamp-on ultrasonic and electromagnetic flow meters

Siemens introduces our latest wireless gateway option for SITRANS FS220 and FS230 clamp-on ultrasonic flow meters and SITRANS FM MAG 6000 electromagnetic flow meters. The gateway converts Modbus RTU to BACnet/IP (Industrial Protocol), BACnet MS/TP or Ethernet IP, providing easy access and a cost-effective interface to industrial communications management systems. The module is designed to interface seamlessly with existing Siemens Modbus protocol nodes.

The Siemens wireless gateway opens a broad market of opportunities by meeting specifications for EIP and BACnet connectivity and simplifying network access with Wi-Fi or wired interface. It dramatically improves start-up times and remote site support for field devices.

The new system has the unique ability to act as a Wi-Fi access point. Users can directly connect their mobile device to the gateway without having to be on the facility's LAN or WAN to interact with local applications.

Each wireless gateway is delivered pre-configured for the customer's specific requirements. No additional programming or mapping is necessary.

You can find more information on the Internet at: www.usa.siemens.com/mag and usa.siemens.com/clamp

Siemens Digital Industries (DI) is an innovation leader in automation and digitalization. Closely collaborating with partners and customers, DI drives the digital transformation in the process and discrete industries. With its Digital Enterprise portfolio, DI provides companies of all sizes with an end-to-end set of products, solutions and services to integrate and digitalize the entire value chain. Optimized for the specific needs of each industry, DI's unique portfolio supports customers to achieve greater productivity and flexibility. DI is constantly adding innovations to its portfolio to integrate cutting-edge future technologies. Siemens Digital Industries has its global headquarters in Nuremberg, Germany, and has around 75,000 employees internationally.

Siemens Corporation is a U.S. subsidiary of Siemens AG, a global powerhouse focusing on the areas of power generation and distribution, intelligent infrastructure for buildings and distributed energy systems, and automation and digitalization in the process and manufacturing industries. Through the separately managed company Siemens Mobility, a leading supplier of smart mobility solutions for rail and road transport, Siemens is shaping the world market for passenger and freight services. Due to its majority stakes in the publicly listed companies Siemens Healthineers AG and Siemens Gamesa Renewable Energy, Siemens is also a world-leading supplier of medical technology and digital healthcare services as well as environmentally friendly solutions for onshore and offshore wind power generation. For more than 160 years, the company has innovated and invented technologies to support American industry spanning manufacturing, energy, healthcare and infrastructure. In fiscal 2018, Siemens USA reported revenue of \$23.7 billion, including \$5.0 billion in exports, and employs approximately 50,000 people throughout all 50 states and Puerto Rico.
