

Improve work order scheduling

Scenario

Maintenance

Maintenance work orders are not always seen in a timely manner, which hampers effective maintenance scheduling

Significance

Productivity

Manually routing work orders to the correct department and/or specialist can mean wasted time and lost productivity

Partner

IBM Maximo®

Effectively schedule and manage maintenance requirements when most appropriate and in alignment with service delivery expectations

Integration

Maximo + Desigo CC

Integration of Maximo with Desigo CC makes it easy to automatically generate and close work orders and tickets based on system alarms

Benefits

Operational efficiency

Free facilities operators from manual scheduling tasks, enabling them to work on more strategic airport initiatives
