

Fire Sprinkler Inspection, Testing, and Maintenance Service

Customized service programs to enhance system performance and protect your people, business, and assets

www.usa.siemens.com/buildingtechnologies

Siemens fire sprinkler inspection, testing, and maintenance service will help ensure your system is ready to respond in an emergency.

Your fire system experts

Rely on Siemens to help ensure your fire sprinkler systems maintain operational status and compliance. Siemens inspection, testing, and maintenance service will help you comply with NFPA standards, local Authorities Having Jurisdiction (AHJ) requirements, as well as meet the federal, state, and local codes specific to your business.

Siemens involvement in industry fire organizations, code development committees, and life safety associations enables us to stay up to date on the latest trends and technology changes so we can help you prepare for the future.

Siemens technicians are experts in the fire sprinkler code requirements of your municipality and have an in-depth understanding of your industry's challenges. Leverage Siemens knowledge so you can stay focused on your business.

Our technicians are industry trained, NICET (National Institute for Certification in Engineering Technologies) certified, and backed by the power and resources of Siemens.

Supported by one of the best training programs in the industry, our technicians

inspect, test, and maintain a variety of sprinkler system types including:

- Wet pipe
- Dry pipe
- Deluge
- Pre-action
- Foam water sprinkler
- Water spray
- Water mist

Tailored to your specific needs

Siemens provides fire sprinkler services in flexible service programs that are customizable to meet your requirements.

Your Siemens account manager can work with you to analyze your current fire protection program and help you develop a plan for potential efficiency improvements that align with your requirements, budget, staff, and business goals.

Single point of contact

Let Siemens be your single point of contact and consolidate your inspection, maintenance, scheduling, and documentation of your enterprise-wide fire protection and life safety systems.

In addition, Siemens can provide solutions that integrate your fire, security, and building automation systems and services.

Comprehensive service

Siemens comprehensive fire sprinkler service provides inspection, testing, and maintenance in accordance with NFPA 25 standards, as well as federal, state, and local requirements specific to your business for the following components:

INSPECTION

- Gauges
- Control valves
- Waterflow alarm devices
- Valve supervisory alarm devices
- Supervisory signal devices
- Hydraulic nameplate
- Hanger / seismic bracing
- Pipe and fittings
- Sprinklers
- Spare sprinklers
- Information sign
- Fire department connections
- Valves (all types)
- Obstruction, internal inspection of piping (5 years)

TESTING

- Waterflow alarm devices
- Valve supervisory alarm devices
- Supervisory signal devices
- Main drain
- Antifreeze solution

MAINTENANCE

- Valves
- Low-point drains (dry pipe systems)

DOCUMENTATION

- Upon completion, you will receive an electronic inspection report that adheres to NFPA standards and satisfies the requirements of your local AHJ.
- Your electronic inspection report ensures legible documentation of your fire sprinkler service.
- Your Siemens technician will review the inspections report with you, discussing any deficient items, recommendations, and next steps.

Highlights

- Certified technicians with expert knowledge of codes, regulations, trends, and technologies
- Tailored services to meet your specific requirements, budget, staff, and business goals
- Single point of contact for enterprise-wide fire protection, security, and building automation
