CGA Quick Ship Inventory (QSI) Program

usa.siemens.com/analyticalproducts

Quick ship inventory is available for continuous gas analyzer products!

Have you ever been here?

An unplanned sudden event or situation arises in which the need for a continuous gas analyzer is an immediate and urgent matter that requires rush delivery.

Siemens answers with the CGA Quick Ship Inventory product program.

Realizing an increasing customer demand for quick delivery of OXYMAT and ULTRAMAT products now makes it possible with quick ship inventory product availability.

Why would you ever need this program...?

- Common in today's state of the art factory and processing plant is the use of an online continuous gas analyzer (CGA) for quality, automation, or safety control purpose. Many factories and process plants operate on a continuous cycle, which means that the measurement data from this device used to control or monitor a process is critical and must be available during 95% of plant run time operation. When equipment goes down. The options are to repair or replace. Often, the amount of time required to do either is the priority issue at hand for both operations and maintenance managers.
- Having equipment available is a key success factor for project managers during project execution; project scope can change, which spurs an immediate need for quick delivery of an continuous gas analyzer.
- Your company issues multiple repeat product purchase orders each year with Siemens Process Analytics and you need fast delivery.
