

**SIEMENS**

*Ingenuity for life*

## Lower Risk. Greater Peace of Mind.

Protect your investments with Advantage+  
Extended Warranties from Siemens Process  
Instrumentation

### Safeguard the Future with Advantage+

All Siemens instruments already include a free two-year manufacturer's warranty. Breathe even easier – and eliminate unpredictable service fees – by adding the Advantage+ Extended Warranty Program.

# Why Choose Advantage+ Extended Protection?

- **Easy to Order**

All it takes is a one-time payment with your product order.

- **Cost Transparency**

Pay absolutely no additional fees for warranty-covered repairs during the selected time period.

- **High Flexibility**

Maximize cost efficiency by choosing a 2-, 3-, 4- or 5-year warranty period.

- **Worldwide Service**

Return your device for warranty repair/exchange at one of our worldwide Siemens locations – and feel secure in knowing the repair will be completed by a factory-certified technician.

- **Traceability**

An available certificate lists all warranty-covered devices, including their selected warranty period. Additionally, you can always check the availability of your device by entering the serial number into the Siemens PIA Portal ([usa.siemens.com/pia-portal](http://usa.siemens.com/pia-portal)).

Siemens standard and extended warranties apply to repair and replacement of devices that have failed under normal operating conditions due to material or manufacturing defects. Need support that goes beyond a warranty? Service contracts are also available to cover installation and field service costs.

Additionally, our highly skilled and extensively trained specialists can provide excellent start-up services according to factory guidelines for any new Siemens process instruments. Backed by an extended warranty of up to 5 years, you can rest assured that your instrumentation is properly calibrated – and performing at its best.

### Ready to gain a competitive advantage?

Visit the Siemens PI Advantage+ website to start protecting your investments today: [usa.siemens.com/aplus](http://usa.siemens.com/aplus)

Siemens Process Instrumentation offers best-in-class measurement and seamless integration into your automation system. We are the total solution provider for flow, level, pressure, temperature, weighing, positioners and more.
