

Value map: Korea

SUSTAINING ECONOMIC GROWTH

Contributing to economic performance

2,500 local Siemens employees

Siemens works with 8,000 suppliers and >17,000 jobs are linked to Siemens' activities in Korea since 1950s*

KRW 1,5 trillion of gross value added linked directly and indirectly to Siemens' operations*

Exporting from Korea to the world

Siemens Korea exported KRW 200 billion worth of healthcare and building products around the world in 2019.

DEVELOPING LOCAL SKILLS & FOSTERING INNOVATION

Providing continuous training and re-skilling

Siemens Korea supported local knowledge transfer by providing customers with >110 training sessions a year that amount to 5,710 hours

Collaborating Industry-academia

Siemens Korea concluded SMSCP MoU with 3 technical high schools and 4 universities and at least 310 students completed Siemens Mechatronic Certification Program since 2015

Siemens Healthineers continues to collaborate with 34 universities and medical institutions for better clinical research and healthcare services in Korea

SUSTAINING THE ENVIRONMENT

Reducing carbon footprint

Siemens contributed to reduce 5 million tons of CO2 in 2017 through Siemens Environmental Portfolio in Korea

Reducing fleet emission

Siemens has been driving global roll-out of car policies including CO2 targets and Siemens Korea reduced carbon footprint by more than 300 tons in 2019 by utilizing low emission cars in fleet

STRENGTHENING THE URBAN INFRASTRUCTURE

Supporting national Power and Grid Stability

Siemens power generation technologies produce electricity to meet up to 24% of the country's power demand in 2019

Siemens contributed to improve national grid stability with Siemens voltage and phasor monitoring solutions installed at 50 substations

Smart Building System

International Finance Center Seoul makes visitors feel safer and comfortable through Siemens building solutions with the data power of 32,000 i/o points

More than 400 connected buildings maximize building performance with Siemens data driven analytics and management solutions

IMPROVING QUALITY OF LIFE

Long-term Commitment

70 years in South Korea and committed to supporting the country's socio-economic development and quality of life

Staff well-being program and flexible working hours to foster a work-life balance of Siemens employees

Supporting cities to achieve sustainability targets

Siemens introduced City Performance Tool to major cities suggesting implementation of infrastructure technologies for sustainable, low carbon development

Improving Health

Siemens Healthineers is No.1 in Diagnostic Imaging market supporting doctors to have fast access to image using MRIs, CT scans for accurate diagnosis

SHAPING SOCIETAL TRANSFORMATION

Corporate Social Responsibility

Employees engaged in Siemens In-house volunteering Programs for up to 5,000 hours since 2013

Siemens Healthineers Mobile Clinic provides complementary healthcare check-up service to children

Fostering integrity and fair business practices

3 billion KRW has been invested through three funding rounds projects – Northeast Asia Business Integrity School (2011-2014), Fair Player Club (2015-2018) and Business Integrity Society (2019-2022) supported by Siemens Integrity Initiative

*PWC Supporting quantitative analysis of economic aspects for B2S in 2019
