Siemens Ltd. wins order worth Rs. 83 crore from Diesel Locomotive Works

- **Scope of the order includes supply of Alternating Current Traction Systems for dual cab high horsepower diesel engine locomotive for Indian Railways**

Siemens Ltd. announced that it has won an order worth approximately Rs. 83 crore from Indian Railways' Diesel Locomotive Works (DLW), Varanasi. The order is to design, supply and install 40 Alternating Current (AC) Traction Systems for dual-cab high horsepower diesel engine locomotives.

“The advent of IGBTs has yielded strong efficiency gains in electric drive technology. The project showcases Siemens' partnership with the Indian Railways as it combines innovation with responsibility to bring together the combined expertise of its teams, that is committed to deliver reliable, safe and efficient technologies,” said Tilak Raj Seth, Executive Vice-President and CEO, Mobility Division, Siemens Ltd.

The AC Traction Systems will be produced at Nashik Factory of Siemens Limited. The Systems have been developed based on the state-of-the-art Insulated Gate Bipolar Transistors (IGBTs) technology. The principle benefit of IGBTs over Gate Turn-off thyristors (GTOs) is that it reduces the current required, and therefore the heat generated, giving smaller and lighter units.
