Transform mobility **for everyone**

Today, transport providers face multiple challenges to move more people and goods on tracks. At Siemens Mobility, we enable our customers worldwide to realize sustainable mobility solutions. As a leading technology company, we combine the real and digital worlds like no other in rail.

In an open ecosystem, we bring together rolling stock, rail infrastructure, rail services, and software to provide sustainable, comfortable, and cost-effective rail traffic today. Together with our customers and partners, we move people and goods seamlessly and transform mobility for everyone.

We combine technologies from the real and digital worlds for **sustainable, comfortable and cost-effective rail traffic.**

Optimized lifecycle costs for rail infrastructure and rolling stock

100% system availability

Maximized network capacity

Optimized customer experience and processes

www.siemens.com/mobility

Our **Portfolio**

Rolling Stock

Short-distance, regional and long-distance rolling stock, product and system solutions for passenger and freight transport

Customer Services

Services for rolling stock, rail infrastructure and turnkey systems, throughout the entire lifecycle

Rail Infrastructure

Products and solutions for rail automation and electrification for mainline, freight and mass transit

Turnkey

Complete rail solutions from project management to system integration of the entire rail portfolio and beyond

Software

Software for train planning, inventory, reservation and ticketing, and Mobility-as-a-Service (MaaS)

SIEMENS

Rolling Stock

Is a global supplier of **rolling stock and system solutions**

Locomotives
and Coaches

Commuter
and Regional

Metros

Components

Light Rail and VAL

Customer services

provides services for rolling stock and rail infrastructure throughout the entire lifecycle, **giving rail traffic a powerful and reliable basis**

Reservation & Ticketing

SIEMENS

How we transform mobility in the **Middle East and Africa**

The **world's longest** driverless metro in Riyadh

This massive public transit initiative supports the city's rapid growth and the country's 2030 vision

Electrification and maintenance of Metro Al Mashaer

It's the highest capacity metro line in the world with 72,000 passenger movements per hour

First cross-border rail project in the Arab world: Abu Dhabi-Sohar signaling

The new 238 km line significantly reduces travel time within the GCC, and enhances our position as an ETCS pioneer

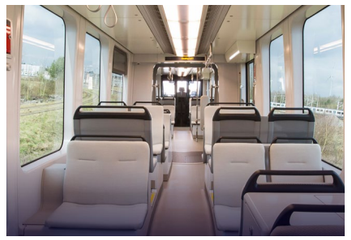

2000 kilometer long **high-speed rail** project in Egypt

Anticipated to be the sixth-largest high-speed network in the world that will be accessible to 90% of the Egyptian population in 60 cities

Velaro **high-speed trains** in Türkiye

19 Velaro trains have achieved a total mileage of 35 million kilometers and transported over 33 million passengers since 2015

A unique tram system: Education City, Qatar

A network without overhead contact lines; 19 Avenio trams that have received multiple design awards; and project that includes signaling, depot workshop equipment, operation and maintenance

www.siemens.com/mobility

Siemens Mobility **Qatar**

Key Highlight **in Qatar:**

Siemens Mobility Qatar is responsible for the operations and maintenance of the Education City Tram, delivering safe, reliable, and high availability services in line with global Siemens standards

- Qatar's first fully operational, fully electric tram system without any overhead contact lines.
- Supports sustainability: lower emissions, less congestion.
- Operations & maintenance, data-driven maintenance for high availability and reliability.
- Climate-resilient operations tailored to Qatar.
- Supports Qatar National Vision 2030.
- Avenio tram design: Red Dot Award 2017, iF Design Award 2018.

Qatar's first fully operational tram system marking a major milestone in the country's public

A fully electric tram system supporting Qatar's sustainability objectives

Education city project is with a length of 12 KM within Qatar foundation

Important **Figures**

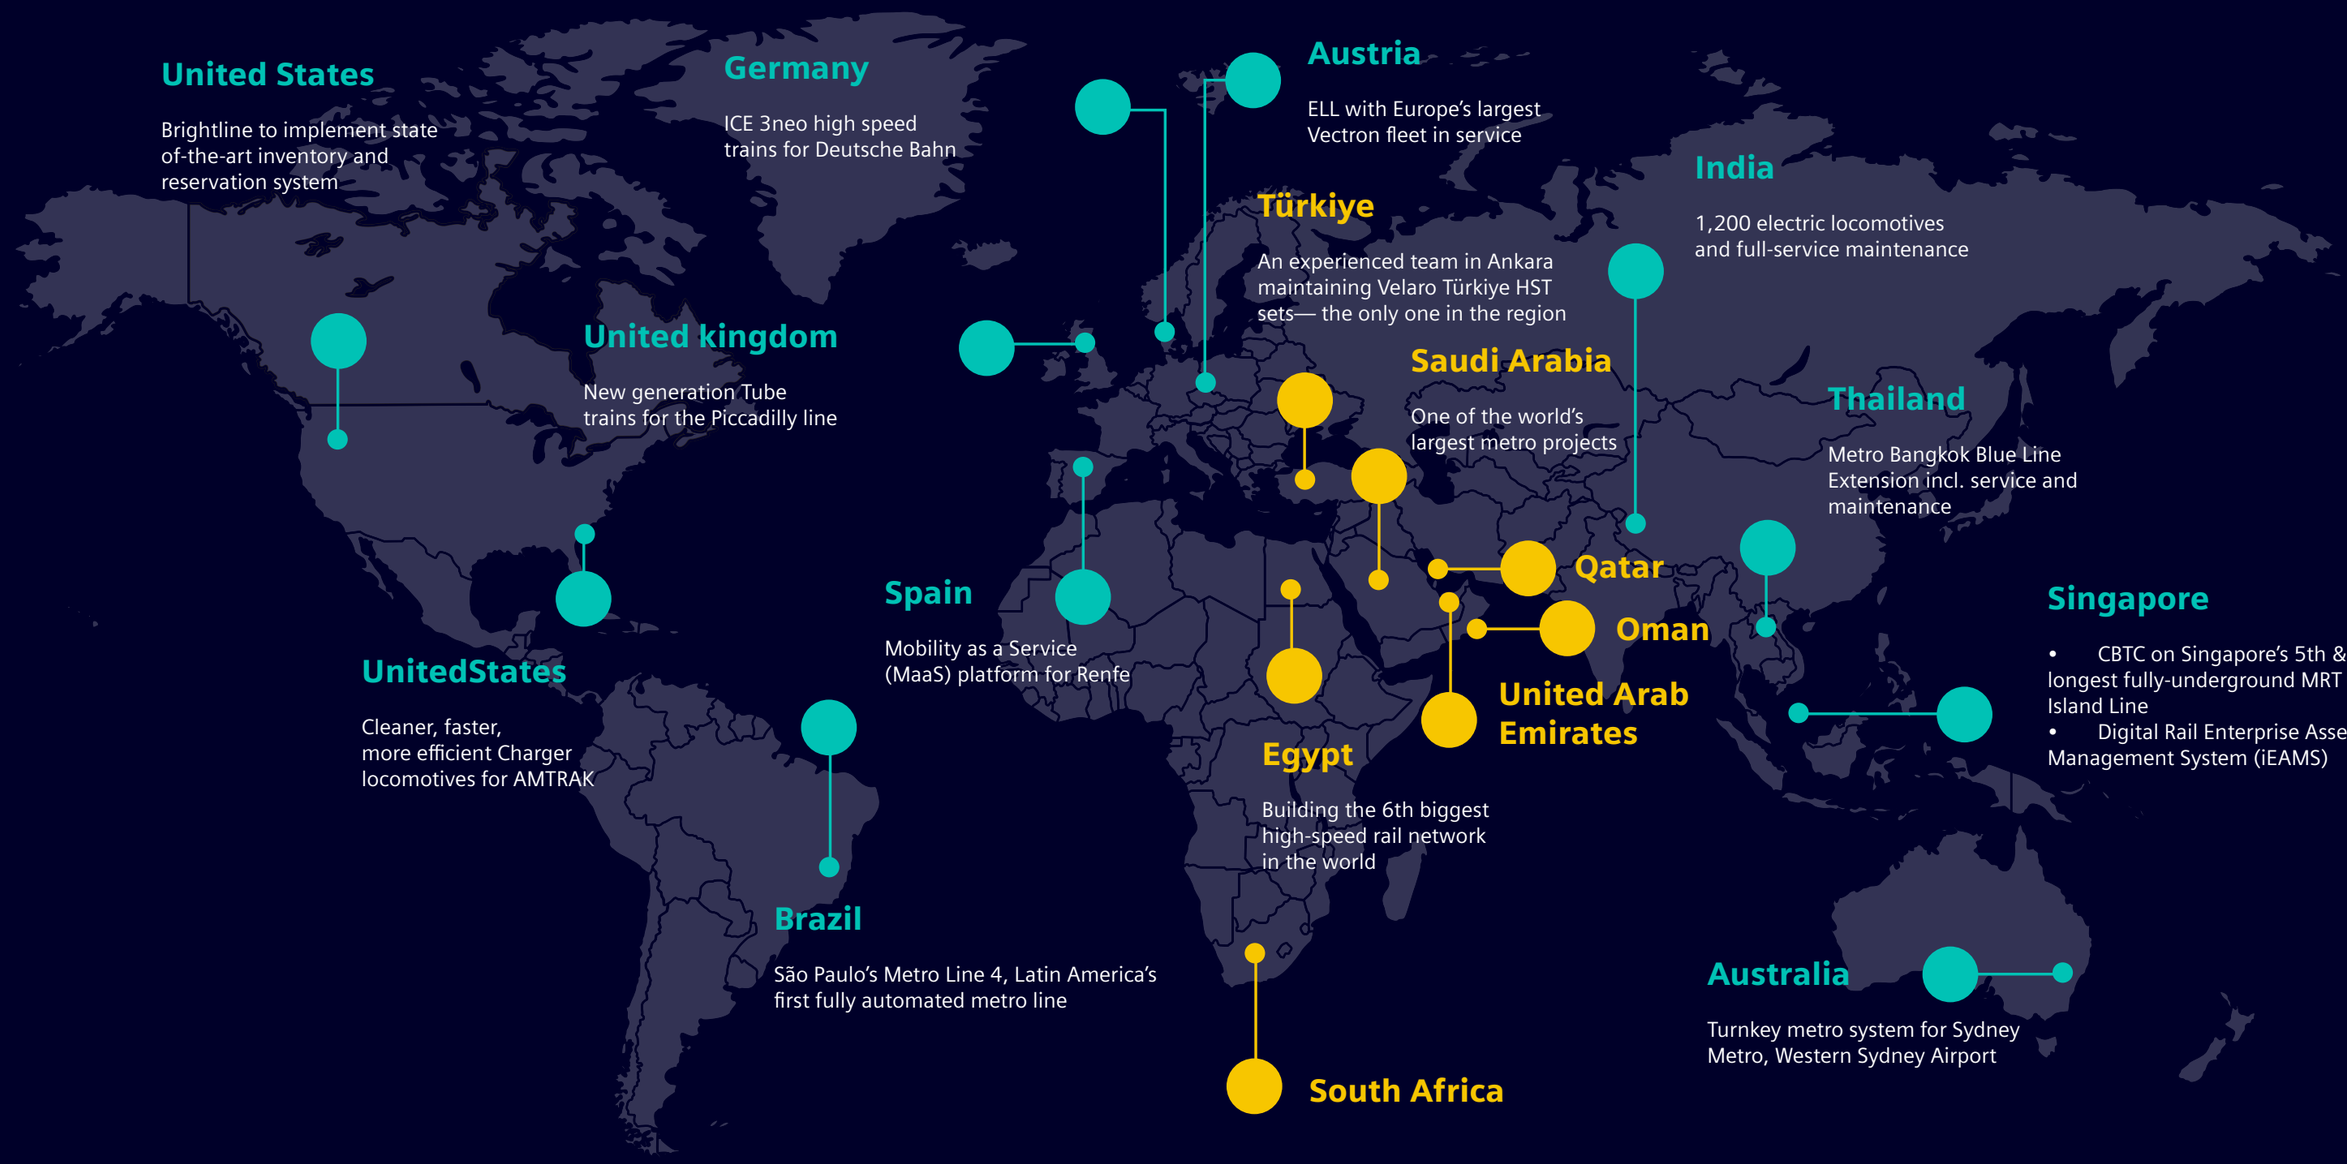

Employees	**136 employees**
Reference portfolio	**TK, CS**
