Short Circuit Current Rating: (Wattour meter not included in short circuit current rating).
This panelboard has a maximum short circuit current rating of 65,000 Amps RMS
symmetrical, 240 V~ maximum. The actual rating is dependent on the branch breakers
installed in this panelboard and the main disconnect, if any, installed ahead of this
panelboard. The correct branch breakers and main/branch breaker series combinations to
be used for various short circuit current levels are listed in the tabulation below. Any circuit
breaker installed, replaced, or added in this panelboard must be manufactured by Siemens
and must be of the correct Type as indicated in the tabulation below.
