

# Going Digital

## The benefits of Electronic Supplier Integration

Dear Business Partner,

As we all know, digitalization is fundamentally transforming the value chain and holds lots of advantageous opportunities for all stakeholders.

**We are currently working on expanding digital collaboration by implementing Electronic Supplier Integration: Platforms such as SupplyOn are perfect for connecting those who embrace the benefits of digitally optimized transactions.**

Through joint order-to-cash and our purchase-to-pay processes, all stakeholders benefit from more efficient and transparent operations.

We invite you to engage in this – and all other collaborative digitalization opportunities – to maximize overall benefits, such as:

- Automated Order Processing: Streamlining operations to enhance efficiency
- Increased Speed: Accelerating transaction times for faster turnaround
- End-to-End Visibility: Providing comprehensive oversight throughout the process
- Elimination of Manual Errors: Enhancing accuracy and reliability
- Improved Quality and Efficiency: Boosting overall performance and outcomes

We are excited to take this step together and hope you'll join us in making our collaboration more digital and future-ready.

Best regards,

Dr. Klaus Staubitzer
