

VIRTUAL TRAINING SOLUTIONS

Turn your **digital assets** **into qualification**

Increasing complexity in manufacturing is one of the biggest challenges for industrial companies. More and more complex production steps must be implemented in ever shorter time. Training of employees in their work steps is becoming more important, especially in combination with product or process changes.

This requires new training methods that make innovative use of the opportunities offered by digitization and make training easier, faster and more flexible. This is made possible with Virtual Training Solutions that support you to turn your digital assets into qualification.

[siemens.com/virtual-training-solutions](https://www.siemens.com/virtual-training-solutions)

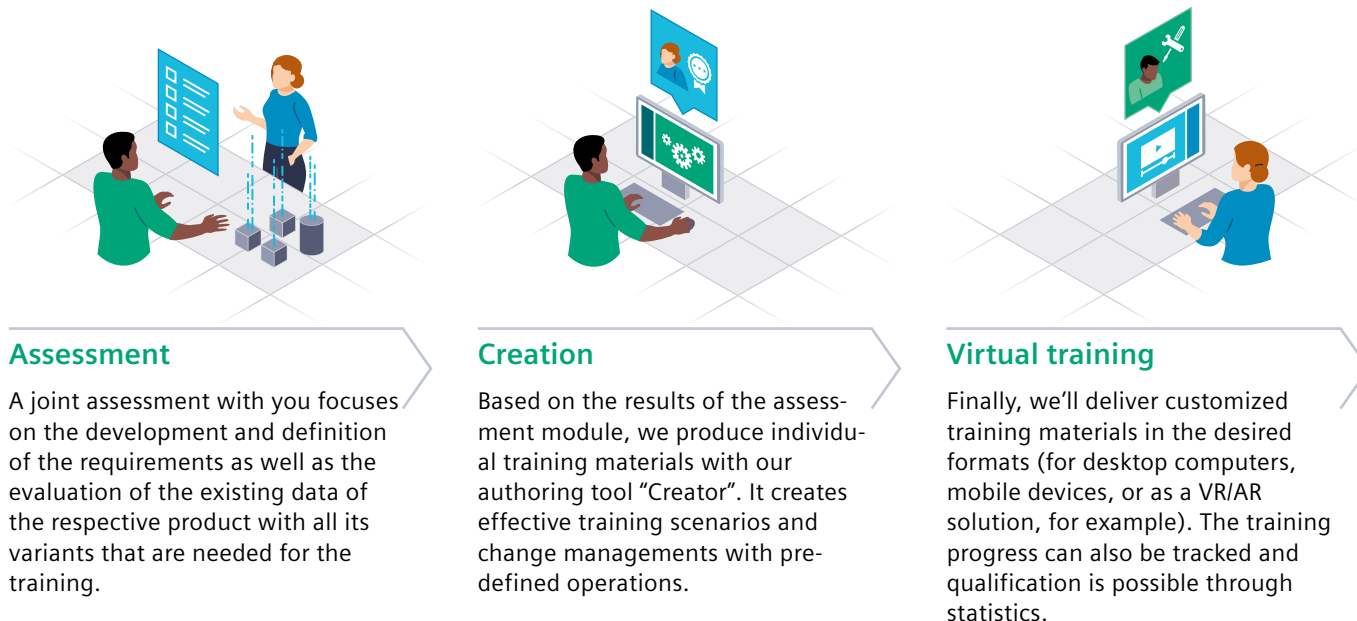

Virtual Training Solutions use your digital assets to create realistic training environments for your workforce. You can reduce the need for physical prototypes and increase the quality of assembly or maintenance. Thanks to state-of-the-art technologies such as Augmented Reality, the quality of your training can be significantly improved. Virtual Training Solutions support desktop and mobile devices such as tablets and smartphones.

Virtual Training Solutions – full-service solution

How can your digital assets be used for customized, effective trainings that use state-of-the-art technologies? Virtual Training Solutions is a full-service solution that comes in three modules.

Your advantages

Subject to changes and errors. The information given in this document only contains general descriptions and/or performance features which may not always specifically reflect those described, or which may undergo modification in the course of further development of the products. The requested performance features are binding only when they are expressly agreed upon in the concluded contract.
