

SIEMENS
Ingenuity for life

By 2025, there will be
40.6 billion connected
IoT devices worldwide.

How quickly can we advance smart building
operation and performance?

Join the Siemens Connect Ecosystem and bring your
innovation to the next level. We're continually developing new
solutions and helping customers collect and convert data into
real-time knowledge for faster, smarter decision making.
If you share the same goals, we'd like to connect with you.

The Siemens Connect Ecosystem Program

Siemens is North America's market leader for safe and secure, energy-efficient and environment-friendly buildings and infrastructures. Siemens Connect brings together experts in software development, IT, remote and digital services, and business intelligence.

Ready to grow your digital applications or services with Siemens Connect?

Together we can provide an end-to-end approach that:

- Drives additional value of buildings via operational and energy efficiencies
- Delivers innovation solutions that create more value for current and prospective customers
- Applies technology to plan preventive maintenance and predict problems before they occur
- Helps customers navigate the transformation of the building technologies industry
- Leverages systems integration data and IoT to connect and listen to buildings

Our holistic approach to technology integration and interoperability means devices and systems must be scalable, adaptable, and able to integrate with Siemens Connect Ecosystem platforms, such as:

- Desigo™ CC
- APOGEE®
- MindSphere

Our combined digitalization and technology expertise can help customers create places that are perfectly designed for their purpose – giving them the freedom to focus on the goals that drive their business forward.

Smart people. Smart technology. Some connections are a natural fit. Let's discuss how we can work together to provide additional value to our customers.

Siemens Connect Ecosystem

Bring your solution to a higher level

Take advantage of the resources, recognition and reputation a global company affords, from marketing opportunities, technical testing environments, integration validation and training resources to collaboration with like-minded innovators and technical support.
