

Environmental Protection, Health and Safety Management Policy

One world, one life – we care.

As the part of a global company, we promote and comply with the principles of sustainable development. We feel socially responsible for meeting the demands of commerce in an ecologically and socially sound manner. We act in accordance with the law, requirements of interested parties as well as other regulations in the field of occupational safety and environmental protection. We work with suppliers and contractors to achieve ambitious goals for our integrated management system. We give high priority to continuous improvement of processes in all areas of our activity.

We introduce environmentally friendly technologies. Our products, systems and solutions help reduce the negative impact of human activities on the environment and save natural resources. We implement a program to reduce CO2 emissions - we strive to improve the quality of life in our environment and around the world.

Protection and promotion of health, as well as activities supporting the motivation and effectiveness of employees have a long tradition in Siemens. These areas are treated as a priority. We promote a healthy lifestyle, positively affecting the atmosphere and quality of work. We believe that the success of our business also depends on the health of our employees.

We care for the safety of all employees, as well as subcontractors and other stakeholders of Siemens Sp. z o.o. By eliminating hazards and reducing risks, we prevent accidents at work and occupational diseases. We implement programs enhancing the culture of work safety and promote proactive activities in this area. We create space for our employees and their representatives to participate and exert real influence on the improvement of health-oriented policy as well as the health and safety and environmental management system.
