

-  **Cost effective**
-  **AI Powered**
-  **Scalable**
-  **Easy to deploy**
-  **Searchable Meta Data**
-  **VMS Integration**

AerWatch® is a groundbreaking solution for museums, ensuring the safety of priceless artifacts and enhancing the visitor experience. With precise artifact monitoring and real-time alerts, museums can swiftly respond to potential security breaches. The system's adaptive AI minimises false alarms, focusing on critical events, while seamless integration with existing security measures enhances overall security effectiveness.

AerWatch® enhances museum operations and security through advanced AI-powered surveillance. It provides accurate visitor counting, demographics, and engagement metrics, while monitoring waiting times and optimising facility usage. The system generates detailed heatmaps of dwell times, identifying popular exhibits and guiding curation decisions. For security, **AerWatch®** vigilantly detects unauthorised access, trespassing, loitering, object removal, and vandalism, ensuring the safety of both visitors and priceless artifacts.

This comprehensive solution significantly improves visitor experience and operational efficiency, allowing museums to better preserve and showcase cultural heritage. By balancing robust security measures with insightful analytics, **AerWatch®** empowers museums to create more engaging, safe, and well-managed cultural spaces.
