

BI Quickstart

Instant insights into shop floor

Product overview

- Pre-built and Ready-to-Go BI Solution for Opcenter MES
- Enables real time visibility
- Delivers standardized KPIs and actionable insights

BI Quickstart

BI Quickstart for Opcenter MES delivers real-time, actionable insights with pre-built data models, dimensions & standardized KPIs. It enables accelerated time to value with ready-to-go reporting for improved compliance readiness & smarter decision-making at scale.

Business Challenges

Complex Data, Limited Insights: Struggle to convert MES data into meaningful, actionable information.

Lack of Real-Time Visibility: Inability to monitor operations instantly leads to delayed responses.

Manual, Time-Consuming Reporting: Heavy reliance on spreadsheets and manual processes slows productivity.

Inefficient Operations: Frequent bottlenecks, unplanned downtime, and poor resource utilization reduce productivity.

Compliance and Audit Risks: Difficulty maintaining accurate, timely reports for regulatory needs.

Why Dhruv BI Quickstart?

Faster Time to Value: Accelerate insights with pre-built data models for rapid deployment and immediate results.

Built for Opcenter MES: Streamlined integration enables smooth, uninterrupted data flow from the shop floor to the dashboard.

Automated, Real-Time Reporting: Access accurate, up-to-date operational data without manual effort.

Boost Operational Efficiency: Identify bottlenecks, reduce downtime, and optimize resource utilization.

eDHR Readiness: Ensure smooth compliance with regulatory standards through built-in support for eDHR reporting.

Key Features

Pre-built Opcenter
Data Model &
Reporting

Standardized KPIs
(OEE, yield, defect
rate, cycle time)

Actionable
insights For
Optimization

Key Takeaways

Fast-tracked learning curve – Dhruv's pre-built data model and KPI flattens the learning curve for your BI team.

Upstart your shopfloor analytics – Unlock value from your Manufacturing data for your strategic growth with Dhruv's BI within weeks.

Reduced TCO - Leverage proven BI solution to improve operational efficiency with significantly shortened implementation timeline and reduced TCO.

Case study 1:

A leading semiconductor manufacturer accelerated their BI transformation with Dhruv's BI Quickstart.

60%

Reduction in time spent on report development and deployment.

100%

Migration of legacy reports to Power BI – plus creation of new dashboards.

<4 Weeks

Go-live enabled by pre-built Opcenter data models.

Multi-site Rollout

The solution was easily replicated across additional plants.

Case study 2:

A leading medical device company ensured compliance and efficiency with Dhruv's BI Quickstart.

Automated eDHR Reporting

Streamlined regulatory reporting with automated electronic Device History Records.

Reduced Compliance Risks

Improved accuracy and audit readiness with standardized reports.

80%

Reduction in time spent on product deployment and reporting tasks.

About Dhruv

Dhruv Technology Solutions is a global technology services provider with deep domain and technical expertise in digital manufacturing with specialty in Siemens Opcenter MES. We strive to make success a norm for our customers, powered by our comprehensive implementation methodology that guarantees delivery and sustainability of technical solutions aligned with industry best practices.
