## Introduction

The Gemini2 Firmware has now been upgraded from GEMINI 12687 Issue8 to GEMINI 12687 Issue9 in order to roll out a fix for a recent communications issue which was reported in the field.

The problem reported was that VMS and Car Park Installations fail to re-attach to GPRS network when O2 perform a SGSN reset.

## Scope

The new GEMINI 12687 Issue9 Firmware is now available to download from the Siemens Traffic website.

All Gemini 2 Units built & Delivered from the factory will now have GEMINI 12687 Issue9 firmware loaded. All Gemini2 units that are returned for repair will be loaded with the latest issue of firmware before leaving the repair centre.

## Procedure

The new Gemini2 Firmware 12687 Issue9 has implemented the following fix:

- Fix for GPRS attach after SGSN reset on cellular network

If you require to upgrade to this latest issue, the new Gemini2 Firmware 12687 Issue9 can be downloaded from > [www.siemens.co.uk/traffic](http://www.siemens.co.uk/traffic)
