Introduction

The Gemini2 firmware has now been upgraded from GEMINI 12687 Issue3 to GEMINI 12687 Issue5 in order to roll out patches for various fixes and improvements.

Scope

The new GEMINI 12687 Issue5 firmware is now available for download from the Siemens Traffic website.

All Gemini2 units delivered from the factory will now have GEMINI 12687 Issue5 firmware loaded.

All Gemini2 units that are returned for repair will be loaded with the latest issue of firmware before leaving the repair centre.

Procedure

The new Gemini2 Firmware 12687 Issue5 will implement the following fixes & improvements:

- compatibility with Peek PTC1 controller (note this requires RMS41 or later)
- RMS over IP
- correction to operation of comms LEDs
- firmware download over GSM added

The new Gemini2 Firmware 12687 Issue5 can be downloaded from www.siemens.co.uk/traffic
