## Introduction

This Bulletin is to provide notification of changes to the list of approved Helios Regulatory Signs which are released for sale and use by Siemens Traffic.

## Scope

Helios Regulatory Signs.

## Procedure

The attached document provides the list of all the Helios Regulatory Signs currently offered by Siemens, along with the details of the TSRGD approval references and criteria. Included in the list are also signs not approved in accordance with TSRGD for use as regulatory signs when part of a traffic signal, but which may be used in exceptional cases with the customers approval.

The following list of Helios Regulatory Signs are no longer valid to the current version of TSRGD. Therefore they have now been removed from the Siemens Pricebook and replaced by the partnumbers below:

667/1/30200/413 EXCEPT BUSES	- replaced by 667/1/30200/436
667/1/30200/421 EXCEPT CYCLES	- replaced by 667/1/30200/437
667/1/30200/422 EXCEPT BUSES & TAXIS	- replaced by 667/1/30200/435
667/1/30200/419 CYCLES ONLY	- no longer valid

With regards to the installed base of the above signs, it is not deemed necessary or recommended by Siemens to change them, as they are all exemption signs which should always be used alongside a mandatory regulatory sign (eg. TSRGD states that signs with TSRGD Ref 954.5, 954.6 & 954.7 can ONLY be used in combination with signs Ref 606, 612 & 613).
