Introduction

This bulletin is intended to provide a notification of the part numbers and product details of the Siemens recommended USB to Serial Adaptor Cable.

This is in response to several issues reported in the field when using similar cables from other suppliers.

Scope

To provide details of the tried and tested USB to Serial Adaptor Cable and how to order it.

Procedure

The Siemens recommended cable is the Lindy USB to Serial Adaptor - 25Way (RS-232).

This USB to Serial Converter allows any modern USB equipped computer to connect to devices equipped with 25 Way serial RS-232 ports. It has also been tried and tested by Siemens on their equipment.

This 1.5m cable is available to order through Siemens using the following partnumber:

6677/32381/003

The cable can also be ordered direct from Lindy using the following manufacturer's partnumber:

42812
