**Introduction**

This bulletin is a notification on the recent upgrade of IC4 Emulator to Version 10.03 to support ST900 Firmware Issue 6.

**Scope**

The emulator supplied with IC4 version 10.11 (or earlier versions) does not include a PB801 Issue 6 emulator. This requires Emulator version 10.03 to be subsequently installed.

If trying to emulate ST900 Firmware Issue 6, without version 10.03 of the emulator installed, the user will be prompted to select an emulator version. PB801 Issue 6 will not be available. Selecting an alternative emulator may produce an error message similar to the following.

***Simulator has failed to load configuration file C:\Programs\Siemens\_AG\IC4\Data\le30023***

**Procedure**

If you require this IC Emulator version 10.03, it is available for download from the Siemens Traffic web site [www.siemens.co.uk/traffic](http://www.siemens.co.uk/traffic)

Any queries with the above procedure please contact:
