

Enhancing safety

Scenario

Local alerts

Building occupants need to be aware of local alerts, such as severe weather and Amber alerts

Significance

Public safety

When building occupants are aware of severe weather or active Amber alerts, they can prepare and make decisions that enhance community safety

Partner

LSC Technologies

Rely on exterior lighting infrastructure with LED lighting beacons, which can alert nearby building occupants of public safety events

Integration

LSC Technologies + Desigo CC

In case of severe weather, for example, Desigo CC can trigger the exterior light beacons to alert people nearby of the active situation

Benefits

Protecting people

Enhancing the safety of building occupants is of utmost importance to building owners and property managers
