

Build a Wind Turbine

1 - Cut around black dotted lines

2 - Fold up where indicated

3 - Create the Wind Turbine base by rolling into a tube and fixing it together with the tab

4 - Place the wind turbine blades onto a cocktail stick and push through the dot both sides of your base.

5 - See if you can make it spin!
Have you thought about colouring in your turbine?

Look at how modifying the angle of the blades makes the turbine spin faster.
