Summary

Siva Kumar leads the Smart Infrastructure business at Siemens Malaysia. He joined Siemens Malaysia in 2015, bringing with him more than 20 years of experience in automation and digitalization of the energy grid market. He had worked with both local and international companies. He is concurrently Head of Electrification & Automation unit in Malaysia.

In his career at Siemens, Siva has held various business development and sales roles, and has been responsible for products, systems and solutions for electrification and automation of medium and high voltage network.

Siva is passionate about enhancing energy efficiency, smart grids and promoting clean energy with digital technologies. He is also driving digitalization of the energy business in Malaysia for local utility companies, power industries and infrastructure businesses. He strongly believes that Siemens creates technology with purpose that helps transform the everyday of Malaysia for a sustainable future.
