Smart buildings – an active contributor to your core business

How can innovative business models help you maximize opportunities of digital disruption?

Every industry has its digital disruptors.

With the right combination of people, technology and services, we provide data-driven insights and actions enabling you to make informed decisions to enhance your building performance and gain an even greater competitive advantage.

Innovation

The revenue of Global Lighting as a Service (LaaS) is expected to have an annual growth rate of 17%.

Workspace and flexibility

By 2030, 30% of corporate real estate portfolio will comprise flexible office spaces.

digital disruption generates business challenges for building owners and tenants.

How do you ensure your building isn’t holding you back?

Smart buildings use a new source of competition advantage by interacting, learning and adapting to the needs of the people and the businesses within them.

Innovative offering
