

# Enhancing energy consumption + comfort

## Scenario

### Saving energy

Building owners seek ways to reduce energy consumption in order to achieve sustainability and efficiency goals

## Significance

### Cost structures

Harvesting natural daylight allows for visual and thermal comfort throughout the building while reducing energy demand and therefore costs

## Partner

### SageGlass

Tintable electrochromic glass minimizes glare and manages heat in response to solar conditions without the use of blinds or shades

## Integration

### Electrochromic Glass + Desigo CC

SageGlass integrates with Desigo CC to save energy lost through windows while enhancing the comfort of people in the building

## Benefits

### Tenant satisfaction

Enhance tenant satisfaction while reducing energy demand, improving comfort and achieving sustainability goals
