

# ALARM IT FACTORY

## YOUR RELIABLE PARTNER

# YOUR PARTNER

## FOR ALARM MANAGEMENT & CONTROL TECHNOLOGY

**Alarm IT Factory GmbH** is your reliable partner for secure alarm management solutions. With our software, the **Alarm Control Center (ACC)**, we ensure fast and effective alerting in the event of faults, accidents, or critical conditions in companies with automated processes. In addition, we provide customized IT services and comprehensive support to ensure optimal assistance for our customers.

For a holistic system solution, we also offer specialized services in **control technology**. Our goal is to safeguard operational processes, minimize downtime, and enhance efficiency.

With a dedicated team of experts, we prioritize innovation, reliability, and customer satisfaction. Benefit from our many years of experience and in-depth expertise in alarm management and control technology.

### 5 REASONS TO USE AN ALARM MANAGEMENT SYSTEM

- 1 Significant Cost Savings Through Rapid Response**  
Production downtimes, technical faults, and IT issues can lead to substantial costs. Early alerting minimizes risks and helps prevent expensive disruptions.
- 2 Reliable Alerts Despite Staff Shortages**  
Whether during vacations, sick leave, or weekend shifts, an intelligent system ensures alarms reach the right specialists – guaranteeing a prompt response at all times.
- 3 Efficient Emergency Communication**  
In the event of a fire or medical emergency, the system instantly connects all relevant personnel in a conference call, enabling swift and coordinated action.
- 4 Clear Transparency in Critical Situation**  
Who is handling which issue? What still needs attention? A structured visualization of tasks and priorities provides a comprehensive overview.
- 5 Proactive Prevention Through Predictive Alerting**  
Small deviations in target values or low material levels can go unnoticed. A smart system detects early warning signs and alerts staff before a critical situation arises.

# BENEFITS

## ALARM CONTROL CENTER

### YOUR FLEXIBLE ALARM SOFTWARE

#### ■ Simple Integration

With numerous interfaces (ACC agents), the ACC seamlessly integrates into SCADA/control systems and PLCs. Our support team provides reliable assistance.

#### ■ Intuitive Operation

A well-designed user interface allows for quick and easy use – without the need for extensive training.

#### ■ Maximum Security

TISAX-certified and tested by cirosec, the ACC meets the highest security standards.

#### ■ Flexible Licensing Model

Pay only for what you truly need – scalable and expandable as required.

#### ■ Seamless Siemens Integration

As an official Siemens partner, we offer proven interfaces for Siemens control systems.

#### ■ High Reliability

Reliable components, configurable monitoring, and optional redundancy ensure uninterrupted operation.

#### ■ Multiple Alarm Channels

Whether via email, SMS, voice call, app, or pager – the ACC reliably reaches the right people.

#### ■ Global Deployment

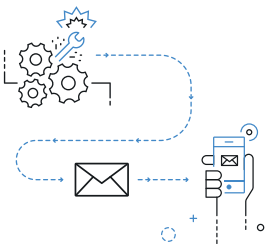

Used in over 50 countries and available in German, English, and French.

#### ■ 24/7 Support

Our expert support team ensures you stay up to date with the latest technology – available around the clock if needed.

#### ■ Made in Germany

Development, support, and sales from Stuttgart – guaranteeing the highest quality and reliability.

#### Interfaces (ACC Agents) – Excerpt:

SIMATIC WinCC V7/V8, WinCC Unified, WinCC Professional and WinCC OA, SIMATIC PCS 7 and PCS neo, Desigo CC, REST, OPC UA, OPCDA, ESPA 4.4.4, E-Mail, MS SQL database.
