Indemnity against Orders

Performance of tests in the TESTING LABORATORY MEDIUM VOLTAGE FRANKFURT AM MAIN

In the “**TESTING LABORATORY MEDIUM VOLTAGE FRANKFURT AM MAIN**” tests on electrical equipment are performed. Chiefly this means following tests:

- Dielectric tests
- Temperature-rise tests
- Peak and short time withstand performance tests
- Arcing due to internal fault tests
- Mechanical impact tests
- Environmental tests

The tests are performed by the test laboratory “**TESTING LABORATORY MEDIUM VOLTAGE FRANKFURT AM MAIN**” in accordance with the standard DIN EN ISO/IEC 17025.

During testing and evaluation, the head of the laboratory and the personnel are kept indemnified against orders of the upper management. He is completely responsible for the technical performance of the laboratory, and particularly that the tests are performed and documented correctly in accordance with the valid standards.

Accordingly, there is no possibility for external influence on test results of the laboratories, whether commercial or otherwise. This also assures that external influence of technical judgments is excluded.
