## Finance Leadership Development Program: *Internship*

### **Program Overview:**

The Finance Leadership Development Program (FLDP) internship is a 12-week summer internship that provides you with hands-on experience in corporate finance subspecialty and the daily operations that drive Siemens' success as an internationally distinguished engineering, electrification, automation, and digital powerhouse.

Over the summer, you will use the knowledge you've gained in school to solve real business challenges and impact our organization's strategic goals, our customers, society, and the environment. You will work with one of our business units at one of our nationwide offices, joining our richly multicultural and inclusive workforce of over 45,000 U.S. employees. You can expect to develop technical skills (e.g., Microsoft Excel, Tableau, and Knime software), work on cross-functional projects, shadow and network with industry leaders, and receive career support and training driven by our empowerment and growth ethos.

This internship is designed to prepare you for the full-time two-year rotational Finance Leadership Development Program. At the conclusion of your internship, you may be considered for the full-time two-year rotational Finance Leadership Development Program or other full-time opportunities (rising sophomores and rising juniors may be invited to return the following summer for a second internship).

### Examples of Past Projects and Rotations:

Interns will be aligned to a singular business unit, which provides interns with exclusive exposure to our innovative technologies and insight into the business' market.

Work locations and project assignments are announced in the Spring and will involve a wide range of functions that may include:

- Performance controlling and financial analysis
- Cost accounting
- Operational unit and internal audit
- Plant or field accounting
- Credit analysis and strategy
