

Siemens and Tata Power-DDL partner for Smart Metering Technologies

- **Meter Data Management System enables timely and accurate collection of electricity meter data digitally**
- **Technology deployed for over 200,000 smart meters in North Delhi**
- **The implementation of Advanced Metering Infrastructure will play a key role in the deployment of smart grids across the country**

Siemens Limited and Tata Power Delhi Distribution Limited (Tata Power-DDL) jointly announced the successful deployment of Smart Metering Technology for over 200,000 Smart Meters in North Delhi. The state-of-the-art EnergyIP Meter Data Management System installed and commissioned by Siemens enables timely and accurate collection of electricity meter data leading to increased visibility of the consumer network and reduction in carbon emissions. The Advanced Metering Infrastructure (AMI) program is one of Tata Power-DDL's key strategic initiatives for the modernization of the grid.

This implementation will help the consumers in real-time consumption monitoring and better energy usage management while also providing them outage and low Power Factor alerts. It will also enable faster outage management.

Siemens' technologies support Tata Power-DDL to achieve their ESG (Environment, Social and Governance) targets of energy efficiency, reduced greenhouse gas emissions, and improved safety for employees and the public. Siemens is also working towards improving safety and reliability in operations for Tata Power-DDL's critical energy assets.

Ganesh Srinivasan, CEO, Tata Power-DDL said, "In partnership with Siemens, we have further strengthened the energy distribution network in our area of operation by

leveraging the state-of-the-art technologies. The digital technologies have enabled us to monitor critical functions of energy distribution in real-time, resulting in higher operational efficiency and productivity, and have proven invaluable during the COVID-19 pandemic. The technologies will further help in ensuring more efficient and uninterrupted power supply for our consumers.”

Robert HK Demann, Head, Smart Infrastructure, Siemens Limited said, “Tata Power-DDL has been one of the pioneers in the adoption of innovative digital solutions. We take great pride in partnering with them in the digitalization of the energy distribution networks. Our aim is to empower our customers to master their digital transformation and sustainability challenges with our technologies. The implementation of Advanced Metering Infrastructure is aligned to the Smart Meter National Program and will play a key role in the deployment of Smart Grids across the country.”

Siemens Smart Infrastructure (SI) is shaping the market for intelligent, adaptive infrastructure for today and the future. It addresses the pressing challenges of urbanization and climate change by connecting energy systems, buildings and industries. SI provides customers with a comprehensive end-to-end portfolio from a single source – with products, systems, solutions and services from the point of power generation all the way to consumption. With an increasingly digitalized ecosystem, it helps customers thrive and communities progress while contributing toward

protecting the planet. SI creates environments that care. Siemens Smart Infrastructure has its global headquarters in Zug, Switzerland. As of September 30, 2020, the business had around 69,600 employees worldwide.

Siemens AG (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power.

In fiscal 2020, which ended on September 30, 2020, the Siemens Group generated revenue of €55.3 billion and net income of €4.2 billion. As of September 30, 2020, the company had around 293,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
