

SIEMENS

Animal Research Facility Solutions

Environmental control and monitoring keeps your facility accredited, compliant and efficient.

www.usa.siemens.com/lifescience

The strength of our solution lies in the close integration of its component elements. In an environment that can be quite demanding, it takes a flexible, expandable solution to provide the kind of agility you'll need to operate today and down the road.

The demands of meeting changing regulations, improving efficiency, saving money and reducing risk require continuous examination of your operating procedures. At Siemens Building Technologies, we have been providing our customers with innovative facility management products and services that address these very issues for many years. We have developed a solution designed especially for animal research facilities and their unique operational requirements.

Our solution takes a comprehensive approach to meeting the challenges you face every day. From the initial assessment through ongoing support, local expertise provides the systems, the services and the resources to ensure your facility is as compliant, efficient, cost-effective and safe as it can possibly be.

Answers for infrastructure.

Complete Animal Research Facility Solution

Combining advanced global innovation with extensive local expertise, Siemens Building Technologies can help you.

Assess regulatory, accreditation, safety and efficiency issues in your current facility systems with our Assessment Survey program.

Monitor and Control environmental conditions, lighting, access, fire, and life safety, utilities, research subsystems and devices, and mechanical systems with our Engineered Solutions.

Manage your entire facility operation with the monitoring, reporting and data archiving capabilities of our Information Management Solutions.

Maintain regulatory and accreditation compliance, operational efficiencies and reliable 24/7 operation with our Service Solutions.

Contact your local Siemens Building Technologies representative to learn more about our solutions. You'll discover how the science of advanced building control and integration can benefit your staff, your research and your bottom line.

Highlights

- Use single workstation for control, monitoring and documentation
- Maximize energy efficiency and cost savings
- Help meet applicable regulatory and accreditation requirements
- Ensure the highest quality of environmental conditions
- Maintain a reliable and secure reporting system
- Trust in having a secure environment to protect staff, animals and research integrity
- Provide safe and healthy work conditions to minimize risk and liability
