

# What is **rSIM<sup>®</sup>**?

**SWIPE TO LEARN MORE**

**CSL created rSIM<sup>®</sup> as a  
response to first-hand  
experience of outages,  
partnering with industry  
leaders to develop a  
globally patented solution**

**rSIM<sup>®</sup>**

**THE WORLDS FIRST**

# The Problem.

Mobile network outages are becoming increasing in frequency and severity, impacting millions of devices requiring substantial investment to fix.

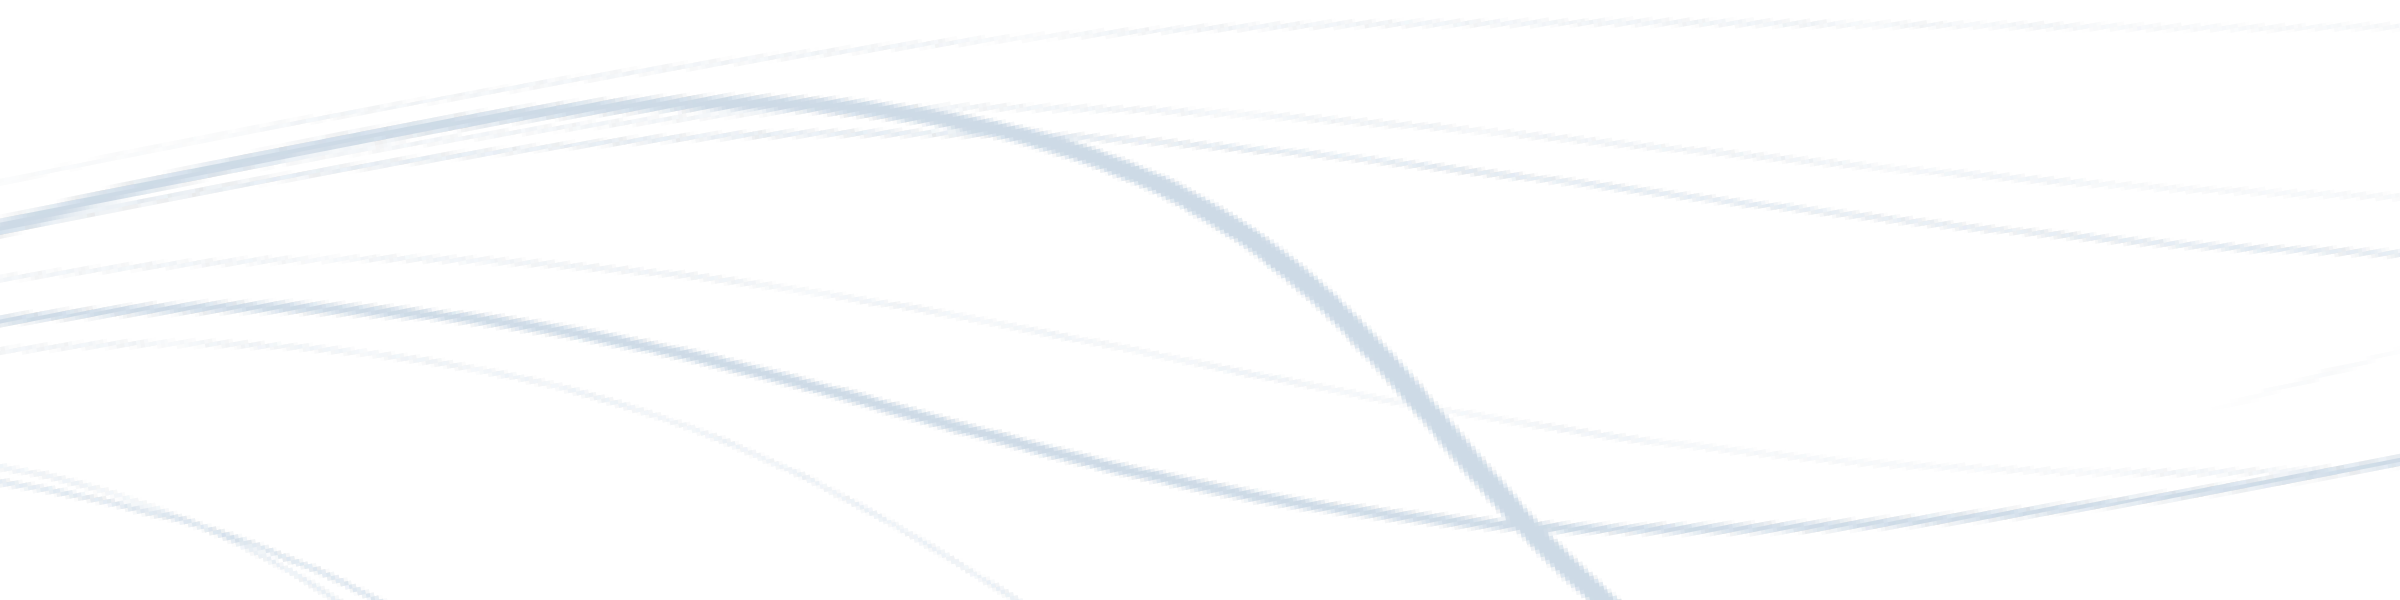

A wide range of IoT use cases are impacted across fire, security, telecare, auto and utilities industries.

**SWIPE TO LEARN MORE**

# The Solution.

The rSIM® is the world's first intelligent SIM that monitors connectivity and actively switches profile to guarantee uptime.

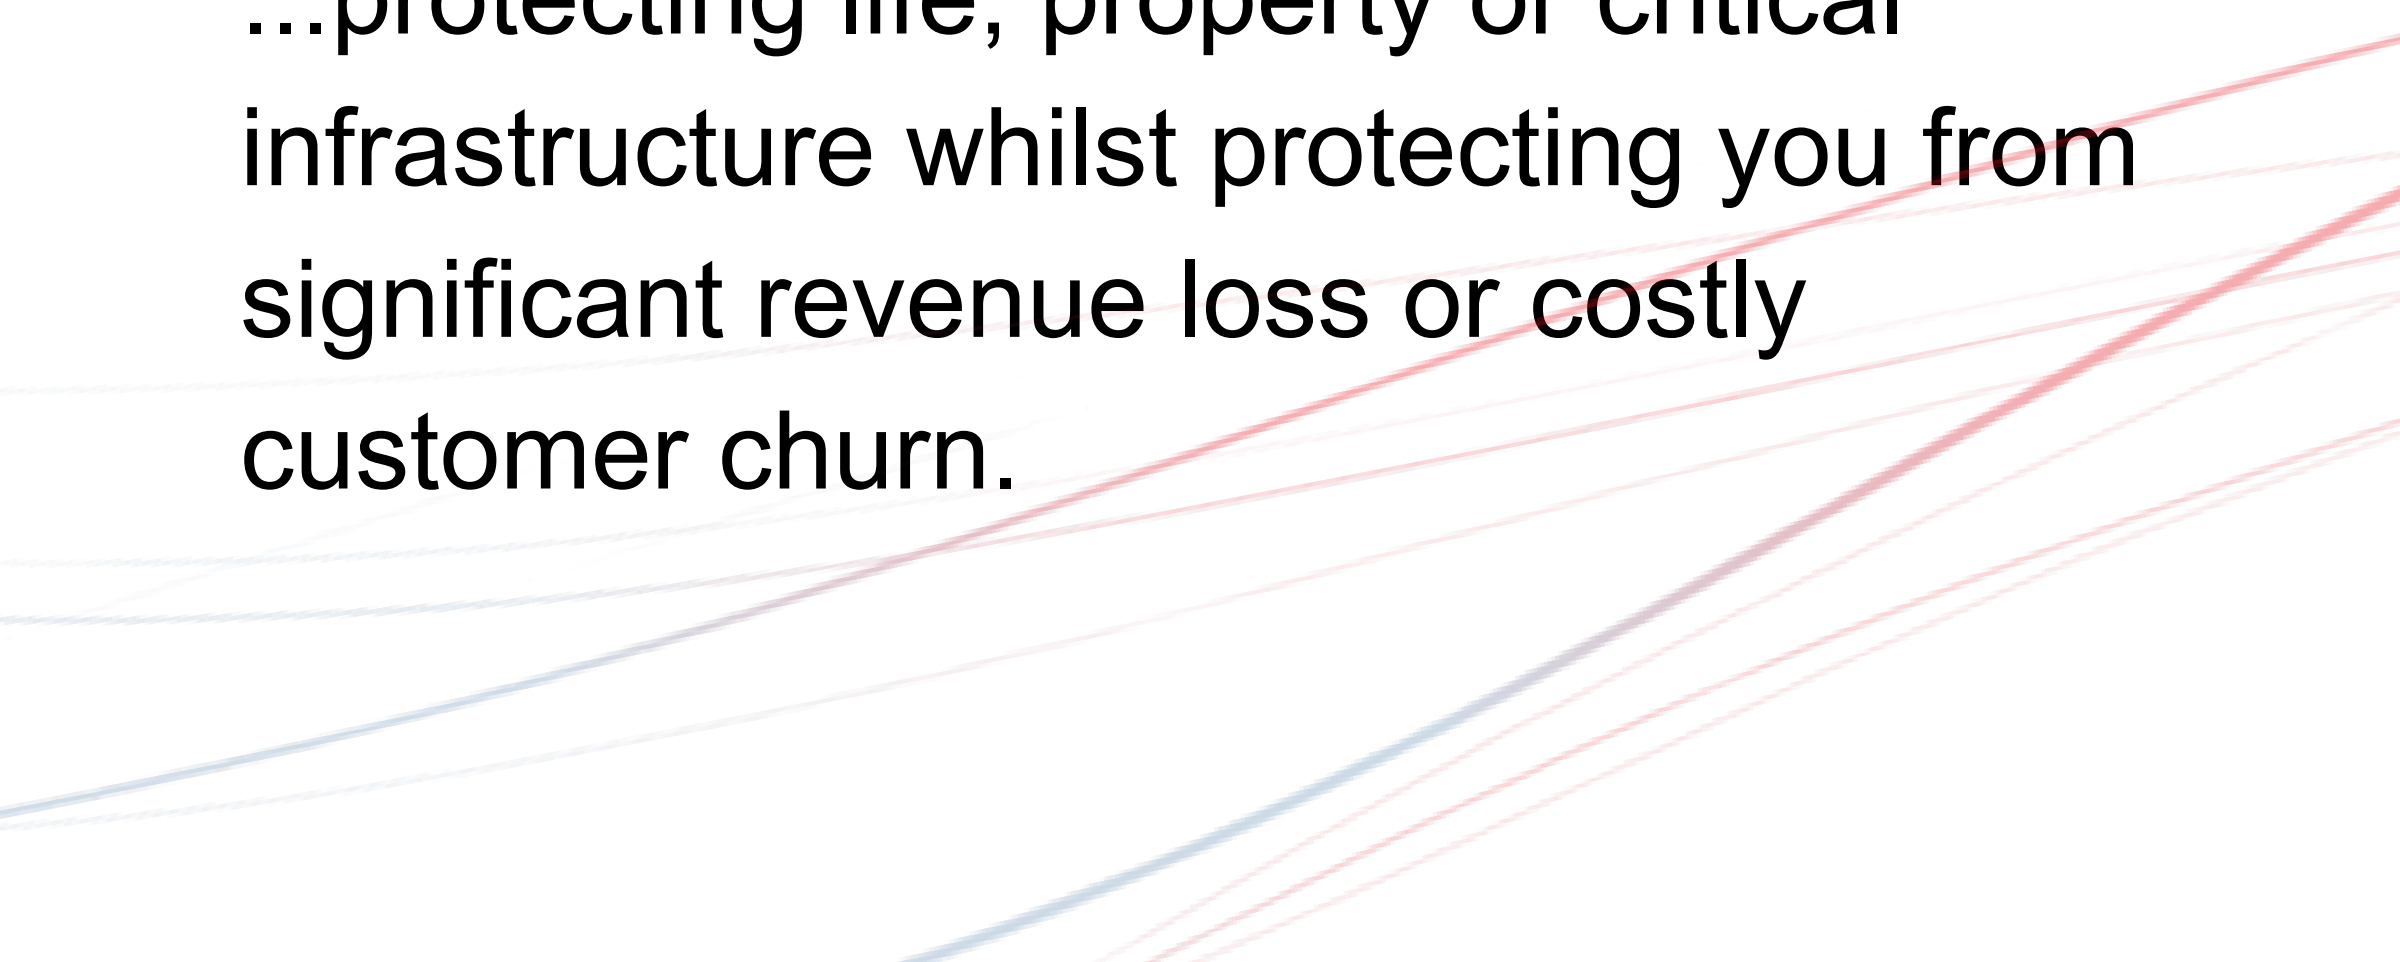

The rSIM® has significant reductions in network downtime from ~8 hours to ~8 minutes.

# The Benefits.

The rSIM® is device agnostic, standards based and autonomous in identifying outages and actioning a profile switch to re-establish connectivity...

...protecting life, property or critical infrastructure whilst protecting you from significant revenue loss or costly customer churn.
