### Siemens: trusted partner for innovative safe and compliant solutions

Siemens' experience and proven processes in meter installation ensure customers can be confident of a robust, cost-effective solution and, in turn, their end customers experience excellent communication and minimal disruption.

We believe that at the core of all strategic energy programmes should exist an effective output-based, data acquisition strategy. Siemens Managed Services work closely with many other areas of Siemens to make sure all customer requirements are met by our total product and service solution.

Meter supply and installation is central to our business. Our team's specific heat knowledge and expertise is demonstrated by a suite of case studies and customer lists featuring valued blue-chip customers. Our experience, expertise and rigorous processes assure efficient and safe installation in non-residential premises.

#### Service Offering

As a multi-disciplinary business, our customers benefit from the huge pool of knowledge we have available at our fingertips. Siemens Heat Energy Services team enjoys working closely with its customers to understand and define strategic goals; and by drawing on expertise from across the business, we can ensure the installed platform supports these.

Our complementary products and services further support our customers' business or site strategy, whatever its focus is: carbon reduction, tangible and sustainable cost savings, or creating a test bed for innovation.

We believe the basis of any heat metering programme is the design of an effective metering strategy supported by dedicated site surveys. Our technical team is on-hand and ready to assist to ensure ideas are effectively planned and delivered.

#### Section header: Project management

On-time and to-budget project delivery is safeguarded by Siemens' accredited project management system: PM@Siemens. Our project managers bring engineering excellence, technical and product knowledge, and an uncompromising focus on Zero Harm to every project they manage.

#### Health and Safety

Siemens has a comprehensive and unwavering focus on Zero Harm. Our investment in our Zero Harm programme has been recognised every year for the past nineteen years by The Royal Society for the Prevention of Accidents (RoSPA) with presentation of its prestigious Gold Award.

#### Financial support

We can make introductions with Siemens Financial Services who would be happy to discuss project financing with developers and operators.
