

**Declaration about the performance of tests in the test laboratory  
PSW - M (Prüffeld der Schaltwerke - Mittelspannung), Siemens AG, Berlin**

In the test laboratory PSW - M (Prüffeld der Schaltwerke - Mittelspannung), Siemens AG, Berlin tests on electrical equipment are performed. Chiefly this means following tests:

- Dielectric tests,
- Mechanical impact tests,
- Temperature-rise tests,
- High-power tests and
- Environmental tests.

The tests are performed by the test laboratory PSW - M (Prüffeld der Schaltwerke - Mittelspannung), Siemens AG, Berlin as an impartial test laboratory in accordance with the standard EN ISO/IEC 17025.

During testing and evaluation the head of the laboratory and the personnel are released from orders of the upper management. He is completely responsible for the technical performance of the test laboratory, and particularly that the tests are performed and documented correctly in accordance with the valid standards. Accordingly, there is no possibility for external influence of the test laboratory, whether commercial or otherwise. This also assures that external influence of technical judgments is excluded.
